California Rate Filing Form
For Individual and Small Group Health Insurance
Rate Filings for Existing Products, Version 2
(do not use this form for initial filings for new product rates)

The rate filing submission should include:

- 1) This form
- 2) A California Rate Filing Spreadsheet
- 3) An actuarial certification
- 4) A spreadsheet with rate information responsive to Questions 10 & 15, below
- 5) A California Plain-Language Filing Form
- 6) A California Plain-Language Spreadsheet

1) Company Name:

2) Number of policy forms covered by the filing: _____

3) Policy form numbers covered by the filing:
List all of the policy form numbers covered by this filing in column "A" of the "California Rate Filing Spreadsheet". List all product names associated with each policy form number in column "B."

4) Product types covered by the filing. Selected from the following:

	HMO (Health Maintenance Organization)
	PPO (Preferred Provider Organization)
	EPO (Exclusive Provider Organization)
	POS (Point of Service)
	FFS (Fee for Service)
	Other (describe) _____

5) Segment type. One of the following:

<input type="checkbox"/>	Small Group (2-50 employees)
<input type="checkbox"/>	Individual

Note: Large Group, Small Group, and Individual filings should not be combined within a single filing.

6) Plan/Insurer Type. One of the following: for-profit company, not-for-profit company

<input type="checkbox"/>	For-profit company
<input type="checkbox"/>	Not-for-profit company

7) Whether the products are open or closed. List each open or closed product by policy form number.

For each policy form number, indicate in column "C" of the California Rate Filing Spreadsheet whether the products are open or closed.

If all policy forms listed are open, check here:

If all products listed are closed, check here:

If only some policy forms listed are closed, check here:

8) Enrollment:

In column "D" of the California Rate Filing Spreadsheet, state the number of lives, including dependents, covered by each product as of the end of the latest month for which the data has been compiled.

9) Insured months in each policy form

In column "E" of the California Rate Filing Spreadsheet, state the number of insured (or member) months for the experience period on which the rates were based. (Does not apply to rates for new products.)

10) Annual Rate

In a separate spreadsheet, for each product included in the filing, show the current and proposed annual premium rates for each rating cell.

11) Total earned premium

For each policy form list:

In column "F" of the California Rate Filing Spreadsheet, state the experience period on which rates are based,

In column "G" of the California Rate Filing Spreadsheet, state the period for which rates are to be effective,

In column "H" of the California Rate Filing Spreadsheet, state the total premium earned for the experience period on which the rates are based.

- 12) In column "I" of the California Rate Filing Spreadsheet, state the total dollar amount of incurred claims in each policy form for the experience period on which the rates are based.

If helpful to understanding the basis for the filed rate increases, the insurer may, but is not required to, disaggregate incurred claim data into the aggregate benefit categories listed in item 18 below.

- 13) In column "J" of the CA Rate Filing Spreadsheet, state the average rate increase initially requested

The weighted average of the proposed rate increases included in the filing, weighting the increases by the number of covered lives for each product (per item 8, above). Rates for new products are not included in this calculation, as they have a weight of zero. (Does not apply to rates for new products.)

- 14) Review category: One of the following:

	Initial Filing for New Product
	Filing for Existing Product
	Resubmission

Resubmissions should be submitted through SERFF under the same state filing number and SERFF tracking number assigned to the original submission of this filing. Do not submit resubmissions as a new filing.

- 15) Average rate of increase

In those instances in which there is a revision to the rates requested after initial submission, the revision should be submitted as an amendment to the original submission of this filing under the rate/rule form tab. Submit a revised California Rate Filing Form, a revised spreadsheet responsive to Question 10, and a revised California Rate Filing Spreadsheet, completing columns A, B, and J. Also, in the case of a resubmission, update the information under the "company rate information" field under the "Rate/Rule Schedule" tab in SERFF. The average rate of increase is a weighted average, calculated as in item 13, above.

- 16) Effective date of rate increase: _____

The earliest anticipated date that the proposed rate increase, or new product rate, will take effect for a policyholder.

- 17) Number of policyholders or insureds affected by each policy form

This information was provided in item 8, above, and need not be repeated.

- 18) Overall medical trend factor and trend factors by aggregate benefit category:

Overall Medical Trend Factor

“Overall” means the weighted average of trend factors used to determine rate increases included in the filing, weighting the factor for each aggregate benefit category by the amount of projected medical costs attributable to that category.

--

Medical Trend Factor by Aggregate Benefit Category

The aggregate benefit categories are each of the following – hospital inpatient, hospital outpatient (including emergency room), physician and other professional services, prescription drugs from pharmacies, laboratory services (other than hospital inpatient), radiology services (other than hospital inpatient), other (describe).

Hospital Inpatient	
Hospital Outpatient (including ER)	
Physician/other professional services	
Prescription Drug	
Laboratory (other than inpatient)	
Radiology (other than inpatient)	
Other (describe)	

Optional Medical Trend Factor by Aggregate Benefit Category by Geographic Region

The insurer may, but is not required to, aggregate additional data in major geographic regions of the state. If the insurer chooses to so aggregate, the major geographic regions of the state are: Northern California (consisting of Monterey, Kings, Tulare, and Inyo counties, and all counties to the north), and Southern California (consisting of San Luis Obispo, Kern, and San Bernardino counties, and all counties to the south).

	North	South
Hospital Inpatient		
Hospital Outpatient (including ER)		
Physician/other professional services		
Prescription Drug		
Laboratory (other than inpatient)		
Radiology (other than inpatient)		
Other (describe)		

19) Projected medical trend

Use the same aggregate benefit categories used in item 18 –hospital inpatient, hospital outpatient (including emergency room), physician and other professional services, prescription drugs from pharmacies, laboratory services (other than hospital inpatient), radiology services (other than Hospital inpatient), other (describe). Furthermore, within each aggregate category quantify the sources of trend, i.e. use of services, price inflation, and fees and risk.

Projected Medical Trend by Aggregate Benefit Category

Hospital Inpatient	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:
Hospital Outpatient (including ER)	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:
Physician/other professional services	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:

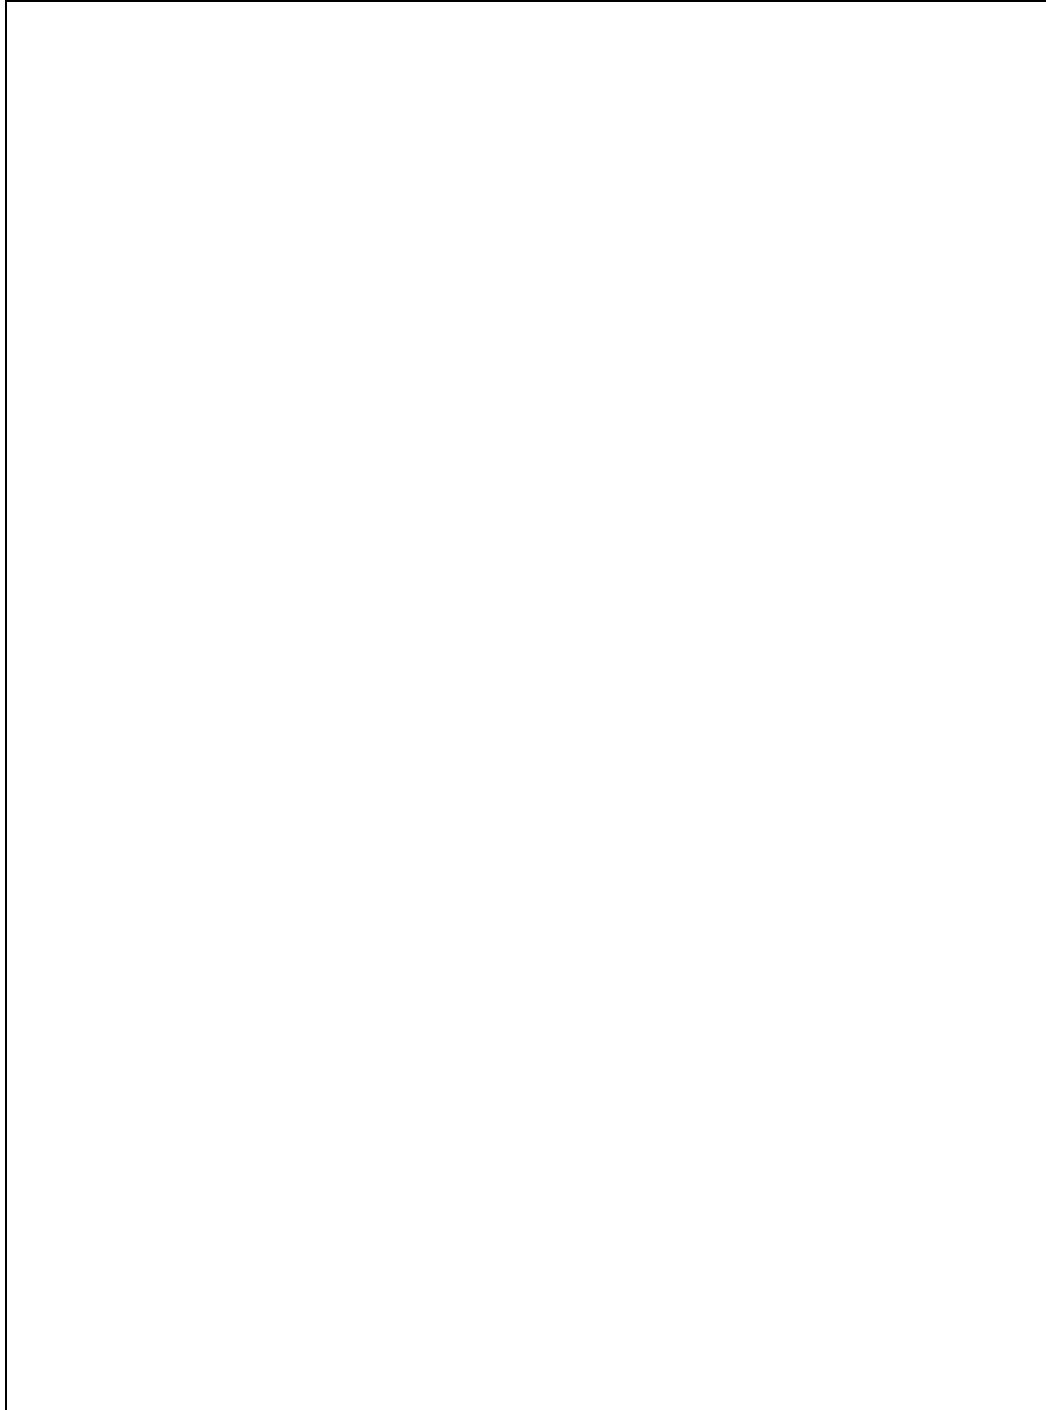

Prescription Drug	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:
Laboratory (other than inpatient)	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:
Radiology (other than inpatient)	Trend attributable to use of services:
	Trend attributable to price inflation:
	Trend attributable to fees and risk:
Other (describe)	

20) Comparison of claims cost and rate of changes over time

For each proposed rate increase, provide the projected annualized incurred claims cost per insured for the period covered by the proposed rate, the historical incurred claims cost per insured for the most recent 12 months of the experience period on which the rates were based, and the historical incurred claims cost per insured for the next two most recent 12 month periods. Also, compare the rate of change of claims costs over all of the projected and historical periods for which information is provided. Show all claim costs according to aggregate benefit category.

--

- 21) Describe any changes in enrollee/insured cost-sharing, compared to the prior year, associated with the submitted rate filing, including both the absolute amount of the change, and the percentage change, and quantify the impact of each change on each of the rates included in the filing. Also describe any changes in benefits exempted from cost-sharing, as well as any newly-imposed cost-sharing.

- 22) Describe any changes in enrollee/insured benefits, including but not limited to hospital inpatient, hospital outpatient (including emergency services), physician and other professional services, laboratory services, radiology services, and other benefits (describe), compared to the prior year, associated with the submitted rate filing, and quantify the impact of each change on each of the rates included in the filing.

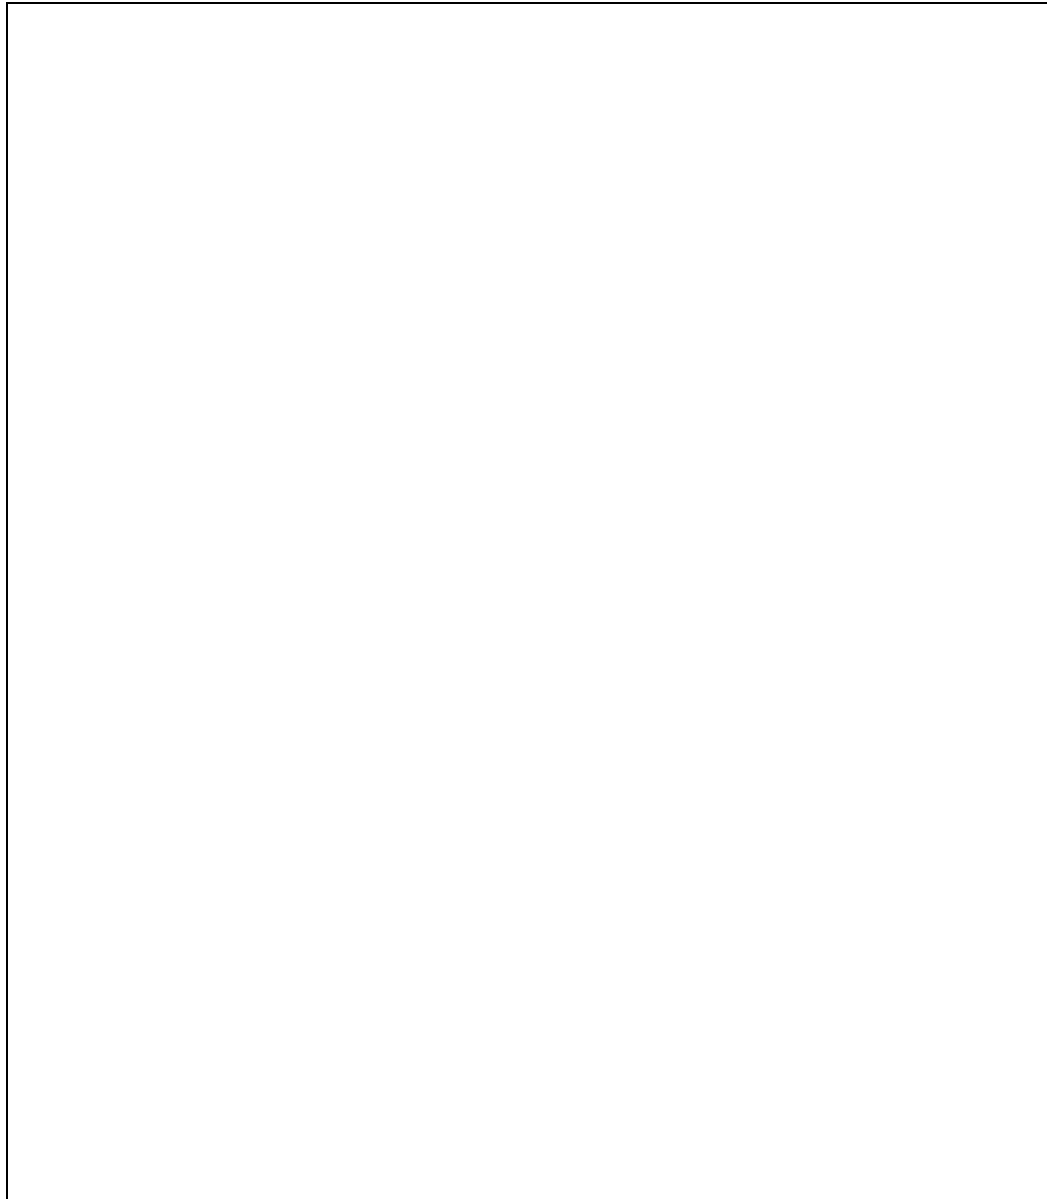

--

- 23) Submit the required actuarial certification, described in Guidance 1163:2, under the "Supporting Documentation" tab in SERFF.

	Submitted
--	-----------

24) Changes in administrative costs

Administrative costs are the costs defined in Sections 158.150, 158.151, 158.160, and 158.161 of 45 Code of Federal Regulations Subtitle A, Subchapter B, in the interim final rule issued by the Department of Health and Human Services on December 1, 2010 at 75 Federal Register 74924-74926. Using those definitions, describe the administrative costs for the policy forms included in this filing for the year prior to the requested rate increase, then also describe any changes in administrative costs, compared to the prior year, associated with the submitted rate filing, and quantify the impact of each change on each of the rates included in the filing. Changes should be shown separately for the costs defined by each of the sections of Code of Federal Regulations listed above in this item. (Does not apply to rates for new products.)

26) Comments. Place any needed comments here.

A large, empty rectangular box with a thin black border, intended for providing comments. It occupies the central portion of the page.

#632743v16

Product-Plan Data Collection

Company Legal Name:
HIOS Issuer ID:
Effective Date of Rate Change(s):

Health Net Life Insurance Company
99110
1/1/2018

State: CA
Market: Individual

Product/Plan Level Calculations

Section I: General Product and Plan Information

Table with columns for Product, Plan Name, Plan Type, and various plan details. It lists products like Broad Network PPO Plans and their corresponding plan names such as Platinum 90 PPO and Gold 80 PPO.

Section II: Components of Premium Increase (PMPM Dollar Amount above Current Average Rate PMPM)

Table showing premium increase components for various plan types and years. It includes rows for Total, Renewal, and Member Cost Share Increase across multiple plan categories.

Section III: Experience Period Information

Table detailing experience period information, including incurred claims, allowed claims, and other financial metrics for different plan types over time.

Section IV: Projected (12 months following effective date)

Table providing projected financial data for 12 months following the effective date, covering premium, claims, and other metrics for various plan types.

Table with 34 columns representing different plan categories like Silver 0.719, Bronze 0.608, etc., and 34 corresponding row IDs.

Table with 34 columns showing values for each plan category, such as 0.00%, 14.33%, 71.68%, etc.

Table with 34 columns showing numerical values for each plan category, ranging from \$0.00 to \$80.00.

Table with 34 columns showing numerical values, possibly representing counts or small monetary amounts.

Large table with 34 columns and multiple rows of numerical data, including values like \$443.31, \$477.01, \$487.44, etc.

Large table with 34 columns and multiple rows of numerical data, including values like \$425.14, \$487.61, \$396.47, etc.

Actuarial Memorandum and Certification

Scope and Purpose

This document contains the Part III Actuarial Memorandum for Health Net's individual health block of business annual rate filing, effective January 1, 2018. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template (URRT) and Part II Written Justification.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I URRT, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

As instructed by Covered California in its June 6th letter ("Supplemental Guidance on Rate Filing Instructions Related to the Cost Sharing Reduction Program"), the premium rates developed and supported by this Actuarial Memorandum assume two formal rate proposals for 2018, with the intent to release both publicly.

1. Proposed rates that include the on-going funding of the CSRs; and
2. Proposed rates that reflect CSRs no longer being funded

This memo assumes (1) Proposed rates that include the on-going funding of the CSRs

It is our understanding that in the event there is still no clear and reliable direction from the federal government if they will directly fund CSRs through 2018, Covered California will direct health plans to use rates that reflect the CSRs no longer being funded. The date on which Covered California will decide whether to move forward based on CSRs not being paid is still being reviewed and the ultimate date will be set in consultation with the state's regulators.

Future modifications in legislation, regulation and/or court decisions may affect the extent to which the premium rates are sufficient and neither excessive nor deficient. Health Net reserves the right to file revised rates in the event of changes to the regulatory environment in which they were developed to ensure rates are appropriate. In addition to CSR payments, material rating impacts could arise from changes to various factors, including but not limited to:

- Advanced Premium Tax Credits
- Individual mandate and its enforcement
- Limit on age rating factors
- Open enrollment and grace periods
- Enrollment of other populations (Medicare, Medicaid, high risk pool)
- Rules for Health Savings Accounts
- Payments under Risk Adjustment, Risk Corridors, and Transitional Reinsurance
- Taxes and fees

This information is intended for use by the California Department of Insurance, Covered California, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Health Net's individual rate filing. However, we

recognize that this certification will become a public document. Health Net makes no representations or warranties regarding the contents of this letter to other users. Likewise, other users of this letter should not place reliance upon this actuarial memorandum that would result in the creation of any duty or liability for Health Net or its employees under any theory of law.

The results are actuarial projections. Actual results will vary from those projected in the filing for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

Introduction

Submitted for your review are Health Net's proposed premium rates our Broad Network PPO, EnhancedCare PPO and PureCare One EPO plan designs. With the exception of the 2 off-Exchange, Non-Mirrored Silver plans, all EnhancedCare PPO and PureCare One EPO plans are offered both on and off Exchange. Although on and off Exchange plan designs are identical, they have separate HIOS IDs to distinguish between the two sets. Broad Network PPO plans are only offered Off-Exchange. All rates are guaranteed for a 12-month period.

Two formal rate proposals for 2018 are presented:

1. Proposed rates that include the on-going funding of the CSRs
2. Proposed rates that reflect CSRs no longer being funded
CSR costs are applied to silver plans only in accordance with Covered California instructions.

This memo assumes (1) Proposed rates that include the on-going funding of the CSRs

Both sets of rates are submitted to the California Department of Insurance in this filing and reflect base rate changes made since the initial filing on May 1, 2017, including:

- **Product and Service Area**
The July 17th filing includes our PureCare One EPO product in all regions in which it was offered in 2017. Our initial May 1st filing assumed that we would be withdrawing this product. We have decided to continue this product line due to a stipulation in a provider contract that we have a foothold in an area (Region 9) of critical importance to the provider.
- **The outcomes of upcoming negotiations for EnhancedCare PPO and PureCare One EPO**
- **Membership Projections**
Due to the exit of Anthem, we expect an increase in our EnhancedCare PPO membership. Membership projections for 2018 were revised accordingly.
- **Additional claims run out on CY 2016 experience**
The projected claims experience was developed using calendar year 2016 non-grandfathered experience. Because the demographics of the existing population have shifted, we exclude all members who have lapsed as the time of the filing preparation.

For the May 1st submission, only claims experience for Broad Network PPO for members who were active with us as of February 2017 were included for the basis of projecting 2018 EnhancedCare PPO claims.

For the July 17th submission, only claims experience for Broad Network PPO for members who were active with us as of June 2017 were included for the basis of projecting 2018 Broad Network PPO and EnhancedCare PPO claims. As we are continuing with EPO, the July 17th submission also contains EPO experience in the single risk pool for all EPO members with us as of June 2017 with the exception of members at a provider group that we are terminating.

- **Morbidity**
We revised the morbidity adjustment to reflect a higher expectation of morbidity on the EnhancedCare product due to the exit of Anthem and the subsequent migration of a portion of Anthem's PPO and EPO business to our EnhancedCare product. We increase our morbidity assumption; an offsetting revision is also made to risk adjustment.
- **Adjustment for the Grace Period**
The Adjustment for Grace Period was reduced to 1.004 after discussions with Covered CA.
- **Risk Adjustment**
Risk adjustment receivable was increased to reflect our expectation of higher morbidity due to the Anthem exit.

As it stands, Health Net is expected to have a moderate after-tax profit loss. It is not Health Net's intention to continue to run at a deficit.

Proposed Rate Increase(s)

This rate filing is for all individuals on these plans, including those sold onto and those renewing from the 2017 version of these plans. The rates are guaranteed until December 31, 2018.

The projected claims experience was developed using calendar year non-grandfathered 2016 experience.

1. Proposed rates that include the on-going funding of CSRs

If our rate request is approved, the expected premium for the entire risk pool is \$533 PMPM with an after-tax profit loss of -1.3% of premium. It is not Health Net's intention to continue to run at a deficit.

This represents an average renewal increase of 17.2% in average premium for the Broad Network PPO and PureCare One EPO plans, weighted on projected premium and projected 2018 members. There is no renewal increase for the EnhancedCare PPO plans as it is a new product. This increase does not include the impact of demographic shifts.

Note that the rate increases of 18.7% (Broad Network PPO) and 14.1% (PureCare One EPO) assume that we are operating at an after-tax loss on premium of -1.3% on the book. If new

membership on EnhancedCare PPO exceeds targets or Health Net finds new initiatives, we would expect the profit position would improve.

Impact of Rate Factor Changes

Plan premiums are calculated as Calibrated Plan Specific Base Rate x Area Factor x Age Factor (subject to the three child limit). The age factors are the federally mandated 2018 ACA age factors. The area and network factors are determined by Health Net, based on underlying regional cost variations which are assessed annual in conjunction with our rate setting.

Impact of Benefit Plan Changes

2018 standard plans are designed by Covered CA. We relied on their AV calculations as a component of plan pricing.

Alternate plans are designed by Health Net and meet the AV calculator metal requirements.

Experience Period Premium and Claims

The new EnhancedCare PPO plans utilize a narrow network. Their rates were developed using the experience of our existing PPO plans which utilize a separate, broader network.

Experience Period:

January 1, 2016 – December 31, 2016

Paid Through Date:

May 31, 2017

Premiums (net of MLR Rebate) in Experience Period:

Premiums are actual member premiums collected during the experience period. The 2016 MLR rebate amount has not been finalized. However, we do not expect to pay rebates and no rebate adjustment has been made to the 2016 premium.

Allowed and Incurred Claims Incurred During the Experience Period:

Allowed and incurred claims, as defined by the URRT instructions, were determined from Health Net's internal claims system. Incurred but not paid amounts were estimated using a combination, as appropriate, of the loss ratio and completion methodologies. The estimation for incurred but not paid amounts is based on the experience period claims reported. Actual claims run-out may reflect some variability from future expectations.

Below is CY 2016 claims experience for all members and plans active in 2016. Note it includes all PPO and EPO members that were enrolled in 2016.

Experience:	Total	PMPM
Experience Period Member Months	326,405	27,200
Experience Period Premium	\$164,634,261	\$504.39
Experience Period CSR Receivables	(\$852,725)	(\$2.61)
Risk Adjustment	(\$64,755,705)	(\$198.39)
System Experience Period Completed Incurred Claims	\$294,277,880	\$901.57

Benefit Categories

Benefit categories are determined using a combination of diagnostic, procedural and other codes pulled from claims data. This process is similar to how claims are mapped in Milliman's Health Care Cost Guidelines, an industry-wide standard. Health Net's algorithm is internally developed and maintained by our Health Care Solutions department.

Projection Factors

1. Eligibility requirements and exclusions conform to ACA.
2. The Index Rate as of January 1, 2018 was developed based on CY 2016 costs for our Individual non-grandfathered Broad Network PPO and PureCare One EPO business and adjusted to reflect anticipated Individual demographics for our Broad Network PPO, EnhancedCare PPO and PureCare One EPO products.
3. The projected claims experience was developed using calendar year 2016 non-grandfathered experience. Because the demographics of the existing population have shifted, we exclude all members who have lapsed as of June 2017 in the experience base period that is used to project 2018 claims. We also exclude EPO members who have claims with a provider group that we are terminating.

	Experience without Lapsers:	Total	PMPM

Z	Admin to Claims reclass	1.004	\$1.94
AA	Projected Incurred Claims	\$525,540,340	\$509.96

(J) OON Substance Abuse Cost Adjustment

Out-of-network substance abuse claims were still an outlier percentage of the claims in Q1 2016, as mitigation strategies could not be implemented until April 2016. This adjustment removes the Q1 2016 claims from the claims development for projection purposes. In addition we also reduce Substance Abuse claims for Substance Abuse reserves which we believe will not be necessary after 2016. These two adjustments reduce projected claims by 1.2%.

	PPO				
	Members	Non-SA Claims	SA Claims	Total Claims	% of Claims
2016/01	15,038	\$685	\$71	\$757	9%
2016/02	15,607	\$641	\$41	\$682	6%
2016/03	16,033	\$748	\$30	\$779	4%
2016/04	16,224	\$731	\$25	\$755	3%
2016/05	16,384	\$767	\$20	\$786	2%
2016/06	16,492	\$818	\$17	\$835	2%
2016/07	16,612	\$643	\$17	\$660	3%
2016/08	16,700	\$819	\$18	\$837	2%

2016/10	16,993	\$833	\$20	\$854	2%
2016/11	17,096	\$821	\$18	\$839	2%
2016/12	17,213	\$855	\$13	\$868	2%

(K) 2017 OON Deductible and OOPM Changes

In 2017 we made the following benefit changes to Out-of-Network deductibles and Maximum Out of Pocket for our Broad Network PPO plans:

OON Deductibles (Individual/Family):

Platinum - \$5,000/\$10,000
 Gold - \$5,000/\$10,000
 Silver - \$5,000/\$10,000
 Bronze - \$12,600/\$25,200
 Minimum Coverage - \$14,300/\$28,600

OON OOPMs:

Platinum - \$25,000/\$50,000
 Gold - \$25,000/\$50,000
 Silver - \$25,000/\$50,000
 Bronze - \$25,000/\$50,000
 Minimum Coverage - \$25,000/\$50,000

The changes in deductible impact the Broad Network PPO plans by -3.2%. These changes impact only Broad Network PPO plans - our PureCare One EPO Plans (which are On-Exchange) are not impacted as they have no out-of-network benefits. Services such as Emergency Care are not subject to the change as they are always paid at the In-Network cost share. EnhancedCare PPO plans are new and therefore the 2017 benefit changes do not impact their rates. The impact to the entire block is -3.0%.

(L) Updates: Current Exposure to Substance Abuse / Region / Metal Tier

Here we adjust claims cost for changes in the expected exposure between the experience period and the rating period. This adjustment is due to the expected inclusion of EnhancedCare PPO which reduces the single risk pool claims due to its lower provider cost structure.

Experience without Lapsers:				EPO	PPO-Broad	EnhancedCare PPO
		Total	PMPM	PMPM	PMPM	PMPM
A	Experience Period Member Months	227,070	18,923	30,287	196,783	
B	Expected Member Months in the Rating Period	1,030,560	85,880	47,988	189,408	793,164

Claims development:				PMPM	PMPM	PMPM
		Total	PMPM			
I	Experience Incurred Claims (H)		\$738.90	\$449.57	\$783.43	
J	OON Substance Abuse Cost Adjustment	0.988	\$730.33	\$449.57	\$773.54	
K	2017 OON Deductible and OOPM Changes	0.970	\$708.66	\$449.57	\$748.54	
L	Updates: Current Exposure to Substance Abuse / Region / Metal Tier	0.787	\$557.89	\$449.57	\$747.82	\$519.09

EnhancedCare PPO rates utilize a separate network from our Broad Network PPO plans. In setting their premiums, we engaged a third party actuarial firm – Milliman – to price the contractual cost differences between our existing Broad Network PPO and the new EnhancedCare PPO product given the contractual agreements for providers who have signed onto the EnhancedCare PPO network. The EnhancedCare PPO rates reflect the expected contracted discounts with providers as of May 2017.

Implicit in the proposed premiums is the assumption that services will be reimbursed at either the in-network reimbursement or the out of network reimbursement levels, even if those out of network providers are in network for our Broad Network PPO product.

The **out-of-network payment levels for non-emergent services** are determined based upon the allowed amount that is established in member’s Evidence of Coverage and subject to the member’s out-of-network cost sharing.

The **out-of-network payment for emergent services** is based upon the Federal regulation that determines the allowed amount as the greater of a) 100% of Medicare b) the median in-network reimbursement c) reimbursement for the same service out of network under non-emergent circumstances.

This restriction allows us to keep the price of EnhancedCare consistent with our negotiated in-network rates and limits selection risk out of network. If we were not permitted this restriction, the underlying costs for EnhancedCare would no longer support these premium levels which we believe are necessary for the product to grow.

Based on a review of the reimbursement rate differences, Milliman produced book rates for both the Broad Network and EnhancedCare network. These book rates indicate that the EnhancedCare Network is expected to be on average 33.2% less than the costs of the Broad Network in regions where they will overlap. This estimate is based on the provider negotiation outcomes as of May 2017.

We adjust the experience claims experience for the expected cost reductions due to the EnhancedCare PPO network. Note that (1) all claims in the Broad Network PPO attributable to Substance Abuse Claimants are removed and (2) CSR receivables are added to the claims costs as the EnhancedCare is an On-Exchange product while Broad Network PPO is Off-Exchange.

(Broad Network Claims Cost - Substance Abuse Claimants + CSR Receivables with Broad Network demographics)

$$\begin{aligned} & \times \text{EnhancedCare Network discount} = \\ & (\$783 - \$67 + \$60) \times 66.8\% = \$519 \end{aligned}$$

Area	EnhancedCare PPO Members	Members in Shared Regions	Book Rate	
			PPO-Broad	EnhancedCare PPO
Area 3	504		\$560.30	\$451.92
Area 15	17,665	17,665	\$443.12	\$266.49
Area 16	15,209		\$366.40	\$357.87
Area 17	9,178	9,178	\$415.73	\$317.36
Area 18	17,404	17,404	\$428.39	\$296.06
Area 19	6,137	6,137	\$439.40	\$292.37
Average Book Cost			\$432.59	\$289.12
EnhancedCare Ratio to Broad				66.8%
Discount (=1 - Ratio)				33.2%

Only EnhancedCare PPO claims dollars are adjusted - the overall impact to the block is a reduction of 21.3%.

(M) Morbidity adjustment

1. Proposed rates that include the on-going funding of CSRs

For PureCare One EPO

We make no morbidity adjustment to the EPO plans assuming that CSRs are funded.

For EnhancedCare PPO

The morbidity of the EnhancedCare PPO population is expected to be significantly better than the Broad Network PPO. Thus we assume that both the risk adjustment receivable and our expected paid claims will come down. We reduce EnhancedCare PPO claims costs by 25% for the improvement in morbidity, as described in items A – C below.

- A. A morbidity adjustment of 0.732 is attributable to the differences in Plan Liability Risk Scores. The Plan Liability Risk Score of the Broad Network is derived from the 2016 RATEE file for the Broad Network PPO, updated for 2018 expected population changes. The Plan Liability Risk Score of the EnhancedCare Network is computed assuming this population will only be 2% higher in morbidity than the statewide average population.

	PPO	Enhanced	
2018	Broad	Choice PPO	Ratio
PLRS	1.786	1.308	0.732

- B. A second morbidity adjustment of 0.946 is due to expected paid to allowed. Since Broad Network PPO has a highly morbid population, their actual paid to allowed ratio is higher than normal and much higher than the paid to allowed ratio calculated by the AV calculator due to a preponderance of claims dollars that are paid after members hit their out-of-pocket limits. We would expect the paid to allowed ratio of the EnhancedCare population to mirror a normal population. We have used our HMO Fee-for-Service population as proxy for a normal population as the HMO pool is a stable pool with normal morbidity.

The HMO Fee-for-Service population has a Paid to Allowed of 79.1% and an AV (from the calculator) of 69.2%. Thus the ratio of the spread between actual paid to allowed versus theoretical paid to allowed is $1.143 = 79.1\% / 69.2\%$.

The Broad Network population has a Paid to Allowed of 84.2% and an AV (from the calculator) of 69.7%. Thus the ratio of the spread between actual paid to allowed versus theoretical paid to allowed is $1.208 = 84.2\% / 69.7\%$.

Assuming EnhancedCare PPO mimics a normal population, we would need to adjust Broad Network PPO claims by $0.946 = 1.143 / 1.208$.

Metal	EnhancedCare MMOS	HMO Paid	HMO Allowed	CSR	Paid/Allowed	AV	Paid/Allowed vs AV
Platinum	7,559	638	674	-	94.7%	89.5%	1.058
Gold	32,660	274	312	-	88.0%	81.0%	1.086
Silver	198,443	218	244	30	76.9%	70.4%	1.092
Bronze	99,794	140	184	-	76.5%	61.9%	1.236
Catastrophic	4,709	51	91	-	55.6%	61.9%	0.898
Total	343,164	208	240	18	79.1%	69.2%	1.143
Metal	Broad Network MMOS	Broad PPO Paid	Broad PPO Allowed	CSR	Paid/Allowed	AV	Paid/Allowed vs AV
Platinum	32,988	3,571	3,990	-	89.5%	88.5%	1.011
Gold	32,144	1,132	1,326	-	85.4%	80.2%	1.065
Silver	75,438	750	905	-	82.8%	70.4%	1.177
Bronze	112,114	367	498	-	73.7%	61.9%	1.190
Catastrophic	15,877	123	189	-	65.1%	61.9%	1.051
Total	268,561	945	1,122	-	84.2%	69.7%	1.208
Paid/Allowed vs AV							
EnhancedCare PPO (use HMO FFS as a proxy)							1.143
Broad PPO							1.208
Ratio							0.946

Note that the Paid to Allowed adjustment in (2) does back out risk score differences. Paid and allowed claims are pre-risk adjustment.

- C. A third morbidity adjustment is made for the exit of Anthem from the marketplace and the expected migration of some of their members into EnhancedCare PPO. We increase claims by 7.7% for the morbidity of their members. An offsetting change is made to risk adjustment.

Thus the EnhancedCare PPO morbidity adjustment for (A), (B) and (C) is $0.75 = 0.732 \times 0.946 \times 1.077$.

The overall impact to claims due to morbidity for the single risk pool over all product lines is 0.818 for scenario (1) where CSRs continue to be funded.

Note that we make no morbidity adjustment to reflect the repeal of the Individual Mandate per Covered CA instruction. Should the individual mandate be repealed or not enforced for 2018, we would expect a 2% to 4% increase for the 2018 plan year. The long term effects of that action would be much greater.

(N) Age Adjustment

We adjust CY 2016 claims to reflect the average age factor of the population in the rating period.

For EPO:

This estimate was derived by a comparison of the change in age of the EPO population.

- A. We pulled the census of every non-grandfathered member in California Individual EPO business in CY 2016, excluding the members who have lapsed in 2017 and who are in the hospital system we are terminating in EPO. The average age factor was calculated based on this population and using the Milliman age factors, which are unbounded and reflect the true underlying impact of age on claims. The calculated value is 1.175.
- B. The average age factor was calculated based on our expected 2018 population and using the Milliman age factors. The calculated value is 1.239.

Hence the Age Adjustment (B) / (A) = 1.239/ 1.175 = 1.054.

For Broad Network PPO:

Since this population is highly morbid, we do not expect a 1% increase in age will increase claims by 1% as for a standard population. Aging in a sick population will have a reduced impact on already high claims. We assess the impact of aging on Broad Network PPO to be 1.9% rather than the 3.2% we would have derived by a comparison of the change in age of the Broad Network PPO population from CY 2016 to the current census in 2017.

1.9% was estimated based on the 2016 Wakely PLRS for this population. In the PLRS score, 19% of the PLRS is due to demographics while 81% is due to health status (“Dx”). We assume that aging will have the full impact of 3.2% on the demographic score but only have half of the full impact (1.6%) on the health status. Thus the weighted average impact of aging on the sick Broad Network PPO population is 1.9%.

	Score	% of PLRS	Aging
Calculated Total Demographic Score	34%	19%	3.2%
Calculated Total Dx Score	144%	81%	1.6%
Impact of Aging on a sick population			1.9%

For EnhancedCare PPO:

As EnhancedCare PPO is developed from Broad Network PPO claims, the change in aging is the change in the Broad Network PPO age factor in CY 2016 versus the expected age of the EnhancedCare PPO population.

- A. We pulled the census of every non-grandfathered member in California Individual Broad Network PPO business in CY 2016, excluding the members who have lapsed as of June 2017. The average age factor was calculated based on this population and using the Milliman age factors, which are unbounded and reflect the true underlying impact of age on claims. The calculated value is 1.109.
- B. As EnhancedCare PPO is an Exchange product, we expect their age to mimic the general Exchange market. The 2018 average age factor was calculated based on statistics released by Covered CA on their average population, which is tends to be older and have less children than an Off-Exchange product like Broad Network PPO. The calculated value is 1.269.

Hence the Age Adjustment (B) / (A) = 1.269/ 1.109 = 1.144.

The average adjustment due to age to the single risk pool is 10.2% over all the product lines.

(O) No Attained Age

The ACA dictates that age attainment be delayed until renewal. The age for premiums is set at the beginning of the rating period; however members are on average 6 months older at the time of claims. We are reflecting the 6 month aging of claims with this adjustment factor. The adjustment was developed by taking our CY 2016 Individual business and aging them one year. This exercise increased premium by 3.0%. Since we can no longer rate for aging upon the member's birthdate, half of this load or 1.5% is not recouped in premium setting.

(P) Area Adjustment

We adjust CY 2016 claims to reflect the average area factor of the population in the rating period.

- A. We pulled the census of every non-grandfathered member in California Individual PPO and EPO business in CY 2016, excluding the members who have lapsed in 2017. The average area factor was calculated based on this population and using the approved 2017 ACA area factors. The calculated value is 1.119.
- B. The average area factor was calculated based on our expected 2018 population and using the approved 2017 ACA area factors. The calculated value is 1.027.

Hence the Area Adjustment $(B) / (A) = 1.027 / 1.119 = 0.918$.

(Q) Plan Adjustment

We adjust CY 2016 claims to reflect the expected benefits to be paid in the rating period.

- A. The experience period has an average plan factor of 0.691, which is calculated as the average actuarial value of our California Individual non-grandfathered PPO and EPO business in 2016 using the standalone AV calculator. This calculation only includes members who have not lapsed in 2017.
- B. We expect the average plan factor for 2018 California Individual business to be 0.697. This valuation was calculated as the average actuarial value of the proposed 2018 plans, using the standalone AV calculator and based on our expected 2018 population. The calculated value is 0.697. The AVs were determined based on the standalone AV calculator which is a paid to allowed calculator.

Hence the Plan Adjustment is $(B) / (A) = 0.697 / 0.691 = 1.009$

(R) CSR Receivables

1. Proposed rates that include the on-going funding of CSRs

For EPO:

CY 2016 CSR was \$13.10 for all members non-lapse EPO members. Adjusting for the projection factors described in (I)-(Q), we expect CSR before trend to be \$14.12. We subtract this value from claims before trend in order to reflect CSR funding.

For Broad Network PPO:

Broad Network PPO is offered only Off- Exchange, therefore CSR does not apply.

For EnhancedCare PPO:

Broad Network PPO is offered only Off-Exchange, therefore CSR does not apply. As our EnhancedCare PPO plans are to be offered On-Exchange we need must make an adjustment for expected CSR. CSR estimates were calculated using our Broad Network PPO experience in combination with assumptions from our HMO business which is offered On-Exchange.

CSR receivables total 14% of CY 2016 claims dollars for Silver HMO plans. We apply this to the CY 2016 Broad Network PPO Silver claims to calculate an expected CSR receivable of \$104.17 PMPM:

$$\$748.95 \times 14\% = \$104.17$$

58% of our members are on Silver plans so we expect a CSR receivable of \$60.24:

$$\$104.17 \times 58\% = \$60.24$$

We apply the EnhancedCare PPO network discount to calculate the estimated CY2016 CSR receivable of \$40.26:

$$\$60.24 \times 66.8\% = \$40.26$$

Adjusting for the projection factors described in (I)-(Q), we expect CSR before trend to be \$30.92. We subtract this value from claims before trend in order to reflect CSR funding.

(S) Adjustment for Benefits in addition to EHBs

There are no adjustments for plan benefits in addition to EHBs.

(T) Adjustment for Grace Period

As this filing includes Exchange products, we expect it to be impacted by the impact of the 90 Day Grace Period to pay plan premiums. We are required to pay enrollee claims for the first 30 days before suspension, provided they are Exchange members. The grace period adjustment is made to compensate for the deficiency in premium caused by this 90 Day Grace Period requirement in the Exchange. While claims for the members in the grace period are reflected in the 2016 claims paid, the deficiency in premium is not accounted for in the calculated adjusted earned premium used to calculate the needed renewal increase, so we adjust claims to account for this deficiency. The adjustment is derived by comparing system generated premium versus premium simulated by using the census pulled as of a snapshot date and the associated rate sheet of that date to calculate premium. Our system generated premium has fluctuated considerably in the past few months. Our valuation of bad debt is 1.004 which was based on the difference between the simulated premium and the system premium and our discussions with Covered CA. As this is only applied to the Exchange products, EnhancedCare PPO and PureCare One EPO, the average over the book is 1.003.

(U) 2017 Trend Adjustment for OON MH/SA

Out-of-Network Mental Health and Substance Abuse claims are expected to trend from 2016 to 2017 by 12.3%, after which they will resume normal medical cost trend. We apply this higher trend to costs associated with Out-of-Network Mental Health and Substance Abuse benefits for 2017 due to the lag time of implementation of mitigation strategies. Overall, this increases Broad

Network PPO claims trend by an additional 0.2% for 2017 and has minimal impact on the book as it has no impact on the EnhancedCare PPO and PureCare One EPO networks which do not have prior year's Mental Health and Substance Abuse experience.

(V) Annual Pricing Trend

Trends are built from a “first principles” approach, calculating the expected unit cost change by hospital and medical group which is then weighted using the historic volume associated with each provider. Variables of trend such as anti-selection, underwriting wear-off, demographic changes, margin for trend, technology/intensity not included. There is no trend margin or fluctuation factor in trend development. Cost trends are supported by known and forecasted contractual increases based on our expectations of contracts in 2018.

The average medical and pharmacy trend is 7.5%. The components of trend are detailed below. All components are based on our Commercial book of business.

Benefit Category	Annualized Trend Factors	
	Cost	Util
Inpatient Hospital	104.5%	102.1%
Outpatient Hospital	104.6%	102.1%
Professional	104.1%	102.1%
Other Medical	102.0%	102.1%
Capitation	102.0%	100.0%
Prescription Drug	113.9%	100.0%

Medical Unit Cost Trend is the increase in health care costs due to medical inflation. It is estimated by reviewing current and anticipated future provider reimbursement arrangements. Note deductible leveraging is not a component of trend, instead it is reflected in the change in AV from current year to the rating period as implicit in the change in the AV calculator.

Medical Utilization Trend is the increase in health care costs due to changes in service. It includes evolutionary changes in medical care practices, increase in the supply of services, and changes in the overall health and/or attitude of the population.

Rx Trend is the increase in health care costs due to prescription drug inflation. We estimate that trend will be 13.9% based on segment specific claims and utilization experience. We combined the cost and utilization trend into one unit/utilization trend composite as the trend development provided to us by Pharmacy did not break out utilization. Further breakdown of Rx Trend is provided below.

Trend - Traditional Generic	20.6%
Trend - Traditional Brand	7.9%
Trend - Traditional Total	10.8%
Trend - Specialty	17.9%
Trend - Total	13.9%

(W) Trended Base Claims Cost

CY2016 claims are trended 24 months, from the midpoint of the experience period (7/1/2016) to the midpoint of the rating period (7/1/2018).

(X) 2017 MLR Initiatives

Broad network PPO and PureCare One EPO will have dedicated cost management initiatives in 2017 that we expect to reduce health care costs. These initiatives will also be in place relative to the EnhancedCare PPO product. We expect these initiatives will reduce costs by 1.8%.

(Y) 2018 MLR Initiatives

Broad network PPO and PureCare One EPO will have dedicated cost management initiatives in 2018 that we expect to reduce health care costs implemented for 2018. They included our Advance Choice Pharmacy Initiative and our initiative to reduce bed days. These initiatives will also be in place for the EnhancedCare PPO product. We expect these initiatives will reduce costs by \$2.19 PMPM.

(Z) Admin to Claims Reclass

This is the portion of administrative costs that can be allocated to claims cost per federal MLR guidelines.

Risk Adjustment and Reinsurance

1. Proposed rates that include the on-going funding of CSRs

	Risk Adjustment/Reinsurance Recoveries	Total	PMPM
AB	Risk Adjustment Estimate		(\$50.10)
AC	Projected Incurred Claims (w/ ACA Adjustments)	\$473,910,405	\$459.86

(AB) Risk Adjustment Estimate

The risk transfer calculations are based on the risk adjustment transfer formula, as provided in the Federal Register Volume 78 Number 47, and displayed below.

$$T_i = \left[\frac{PLRS_i \times IDF_i \times GCF_i}{\sum_i (s_i \times PLRS_i \times IDF_i \times GCF_i)} - \frac{AV_i \times ARF_i \times IDF_i \times GCF_i}{\sum_i (s_i \times AV_i \times ARF_i \times IDF_i \times GCF_i)} \right] \bar{P}_s$$

Where:

\bar{P}_s = state average premium;

PLRS_i = plan i's plan liability risk score;

AV_i = plan i's metal level AV;

ARF_i = plan i's allowable rating factor;

IDF_i = plan i's induced demand factor;

GCF_i = plan i's geographic cost factor;

s_i = plan i's share of state enrollment as measured in member months;

and the denominator is summed across all plans in the risk pool in the market in the state.

We participated in Wakely's 2016 risk adjustment simulation. Historical risk adjustment formula factors are derived from the 2016 RATEE file and Wakely's simulation.

We project the portfolio average for each factor in the risk adjustment transfer formula using a combination of (i) 2016 RATEE file and 2016 HHS Summary report (ii) historical risk adjustment factors provided by Wakely, adjusted to the projected population, and (iii) adjustments for market and risk adjustment program changes. The resulting aggregate payment or receivable is then proportionally allocated to all plans in the portfolio.

For the purpose of our modeling, each of these factors was approximated as follows.

P: The statewide average premium is dependent on how much premiums increase across all carriers. This value is dependent on whether CSRs will be funded.

1. Proposed rates that include the on-going funding of CSRs

For the state average premium, it was assumed the 2018 average statewide premium is approximately \$412 PMPM (net of a 14% administrative cost carve out) under the scenario that CSRs are funded.

PLRS: The statewide average risk score is projected based on the average PLRS of the single risk pool in 2016, from the 2016 RATEE, adjusted for projected changes in the demographics, morbidity, and plan mix of the single risk pool from 2016 to 2018.

Note, we expect our EnhancedCare PPO product to have slightly higher morbidity than the market. The claims and risk adjustment are assumed to have the PLRS that derives a risk transfer of 2% of the statewide average premium after accounting for new catastrophic reinsurance in risk adjustment formula.

GCF: No adjustment was assumed for the geographic rating factors for the Statewide GCF.

The average GCF for Health Net is projected by applying the GCF factors from the 2016 HHS Summary report to Health Net's 2018 projected population.

AV: The statewide average actuarial value (AV) is projected based on the average metal level AV of the single risk pool in 2016, as reported in Wakely.

The average AV for Health Net is projected by applying the metal level AV factors from the 2016 HHS Summary file to Health Net's projected population. The formula recognizes the following AV values by metallic tier: Bronze 0.60, Silver 0.70, Gold 0.80, and Platinum 0.90.

ARF: The statewide average ARF is projected based on the average ARF of the single risk pool in 2016, as calculated on the 2016 HHS Summary file, adjusted for projected changes in the demographics of the single risk pool from 2015 to 2018.

The average ARF for Health Net is projected by applying the proposed 2018 HHS age rating factors to Health Net's projected population.

IDF: The statewide average IDF is projected based on the average IDF of the single risk pool in 2016, as calculated on the 2016 HHS Summary file.

The average IDF for Health Net is projected by applying the induced demand factors from the 2016 HHS Summary file to Health Net's 2018 projected population. The formula recognizes the following IDF factors by metallic tier: Bronze 1.00, Silver 1.03, Gold 1.08 and Platinum 1.15.

Our risk adjustment estimate for 2016 is a receivable of \$136.67 across the Broad Network PPO and PureCare EPO product lines (we exclude members who lapsed as of June 2017 as they are not in the projection).

2016	State	Issuer
MMOS	25,343,212	227,070
PLRS	1.371	1.738
GCF	1.011	1.125
AV	0.700	0.678
ARF	1.569	1.510
IDF	1.038	1.031
k inc risk (PLRS x GCF x IDF)	1.438	1.996
k ex risk (GCFxAVxARFxIDF)	1.139	1.190
Xfer		34.4%
Transfer PMPM		\$136.67
Statewide Average Premium	\$397.43	

1. Proposed rates that include the on-going funding of CSRs

Our risk adjustment estimate for 2018 is a receivable of \$50.10. Of this amount, \$0.15 is attributable to the new high risk cost pool, which separates claimants above \$1.0 million from the standard risk pool into their own risk pool.

2018	State	Issuer
Rating Period MMOS	25,343,212	1,030,560
PLRS	1.371	1.446
GCF	1.011	1.129
AV	0.700	0.679

IDF	1.038	1.032
k inc risk (PLRS x GCF x IDF)	1.438	1.679
k ex risk (GCFxAVxARFxIDF)	1.139	1.189
Xfer		12.5%
Transfer PMPM		\$49.95
Impact of High Risk Pool		\$0.15
Statewide Average Premium	\$412.10	

Non-Benefit Expenses and Profit & Risk

Total Premium Retention is the amount to be retained by the insurer to cover all of the insurer's non-claim costs including expected profit. Note we display profit on an after-tax basis per the methodology established by the Unified Rate Review template which specifies that taxes and fees should include income tax and profit should be reported on an after tax basis.

1. Proposed rates that include the on-going funding of CSRs

	Admin Development	Total	PMPM	% of Revenue
AD	Administrative Expenses	\$46,078,968	\$44.71	8.4%

AR	Total Administrative Costs	\$53,591,064	\$52.00	
AS	Total Taxes and Fees	\$29,416,721	\$28.54	
AT	After-tax Profit/Margin	(\$7,174,343)	(\$6.96)	-1.3%
AU	Required Revenue	\$549,743,848	\$533.44	
AV	Risk Adjusted Revenue		\$583.54	
AW	Requested Base Rate		\$533.44	
AX	Requested Renewal Increase			
AY	Target Medical Loss Ratio			86.2%

(AD) Administrative Expenses

Projected operating expense is \$44.71. This allowance is based on the projected enrollment and is estimated to appropriately cover expenses for overhead, operations, sales, and marketing expenses.

(AE) Commissions

Broker commissions are \$14.00 PMPM. This is based on our agreements with the brokers.

We expect 52% of enrollment to come through brokers based on past historical experience, thus the cost to the single risk pool is \$7.29.

(AF) Broker Bonus

We do not pay a broker bonus on this business.

(AH) Premium Tax

There is no adjustment made for premium tax as the premium tax for this block was set at 0% as in order to mitigate the implementation of the tax on Managed Care Organizations.

(AI) Risk Adjustment Fee

The Risk Adjustment Fee for 2018 is \$1.68 per member per year, or \$0.14 PMPM.

(AJ) Reinsurer's Fee

We are not assessed the Reinsurer's Fee for 2018.

(AK) Exchange Fee

Based on projected 2018 membership, 56% of our membership will be in the Exchange across the EPO and EnhancedCare PPO product lines. Business in the Exchange is assessed an Exchange Fee of 4.0% of premium. This fee must be spread to the entire book, both on and off Exchange, as rates off the Exchange for Qualified Health Plans must match rates on the Exchange. That implies that all plans must incur at charge of 2.3% of premium per member, per month to reflect the assessment of the Exchange Fee.

(AL) Insurer's Fee

We estimate the Insurer's Fee for 2018 as 2.2% of risk-adjusted premium or 2.4% of premium. This estimate does not include the tax implications of the fee. For 2017, there was a moratorium on the fee.

(AM) PCORI

These are fees set by the Federal Government. PCORI is \$0.20 PMPM in 2018.

(AN) Income Tax

Income tax is calculated as:

$$\text{Income Tax} = (\text{After-Tax Profit} + \text{Insurer's Fee}) / (1 - \text{Corporate Tax Rate}) \times \text{Corporate Tax Rate}$$

(AO) Adjusted Earned Premium

For Broad Network PPO and PureCare One EPO:

A renewal increase is calculated by comparing the proposed premium with an effective date of January 1, 2018 versus the adjusted earned premium one year prior or January 1, 2017.

The adjusted earned premium is the Individual rates filed for CDI ACA plans with 2017 effective dates. It is calculated by pulling a census of every non-grandfathered member in California Individual PPO and EPO business as of February 2017. All members are rated as if they were on 2017 ACA plan using the rating formula:

$$\text{Member Premium} = \text{Plan Specific Base Rate} \times \text{2017 Age Factor (with 3 child limit)} \times \text{Area Factor}$$

$$\text{Book of Business Premium} = \text{Sum of all Member Premiums (subject to the 3 child limit)}$$

The age factor of this population is determined by mapping every member to their 2017 ACA age factor, with the 3 child limit based on their age on January 1, 2018, so that one year's worth of aging is not included in the renewal increase.

The area factor of this population is determined by mapping every member to their ACA area factor based on their current zip code.

The average plan factor of this population is the plan actor of the ACA plan they are currently enrolled in.

Thus current premium and projected incurred claims use the same demographics basis and a comparison of Required Premium versus Adjusted Earned Premium for existing products is the Renewal Rate Increase, the annual increase from 2017 to 2018.

(AP) After Tax Margin/Profit

The 2018 target profit is -1.4% of premium. It is not Health Net's intention to continue to run at a deficit. The intention is to bring costs down as much as is possible to reach our long term target.

(AQ) Requested Renewal Increase

The comparison between required premium (which is projected incurred claims plus administrative expenses plus profit) and current premium determines the renewal increase.

1. Proposed rates that include the on-going funding of CSRs

The renewal increase by plan is shown below. The overall average renewal is 18.7% for our Broad Network PPO plans and 11.4% for our PureCare One EPO plans assuming CSRs are not funded. This increase does not include the impact of demographic shifts. The EnhancedCare PPO product is a new product filing so there is no renewal increase for those plan designs. We show the renewal rate changes for members age 40 below.

Plan Name	Exchange	Age 40 Renewal %												
		2	4	5	7	8	9	10	14	15	17	18	19	
Platinum 90 PPO	Off	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%	15.0%

Minimum Coverage PureCare One EPO	On	14.3%	14.3%	14.3%		14.3%	-10.0%	14.3%						

Variation in rates is due to:

A. 2018 child age factors

The CMS standard children's age factors from plan year 2017 to 2018 will not impact the pool's average renewal increase as this change was revenue neutral to the single risk

pool. But the child age factors were increased from 2017 to 2018, thus child renewal rates are higher and adult renewal rates are lower than what they would have otherwise been. The adult renewal rates are 3.0% lower than the book average due to the change in child age factors.

Broad PPO/EPO					
Age	Members	New Age Factor	Old Age Factor	Change	
0	12	0.765	0.635	20.5%	
1	187	0.765	0.635	20.5%

20	282	0.970	0.635	52.8%	
Subtotal	5,229	0.81	0.64	27.8%	
All Other	14,554	1.91	1.91	0.0%	
Total	19,783	1.619	1.57	3.0%	

B. Reduction in Region 9 Area Factor for PureCare One EPO

We are continuing to offer EPO. However, we are terminating a hospital system from the network; this termination allows us to have a moderate renewal increase as shown above. We have also improved provider contracting with a hospital system in Region 9, that allows us to lower the area factor, so that the region 9 renewal is actually a decrease from 2017 rates (excepting for the CSR impact load).

Projected Loss Ratio

The projected medical loss ratio (MLR) satisfies the Federal minimum MLR requirement of 80%. This projected MLR is calculated according to 45 CFR 158. The projected MLR is the projected 2018 calendar year single risk pool experience rather than the three-year period used for determining rebates. No credibility adjustment based on projected enrollment and average deductible was estimated; including a credibility adjustment would increase the projected MLR. See below for the detail.

1. Proposed rates that include the on-going funding of CSRs

	Federal MLR Calculation	Total	PMPM	% of Revenue
AZ	Premium tax	\$0	\$0.00	0.0%
BA	Risk Adjustment Fee	\$144,278	\$0.14	0.0%
BB	Reinsurer's Fee	\$0	\$0.00	0.0%
BC	Exchange Fee	\$12,404,619	\$12.04	2.3%
BD	Insurer's Fee	\$13,230,404	\$12.84	2.4%
BE	PCORI	\$201,818	\$0.20	0.0%
BF	Income Tax	\$3,435,602	\$3.33	0.6%
BG	Quality Improvements	\$5,554,957	\$5.39	1.0%
BH	Federal MLR [= (Claims + QI)/(Revenue - Taxes)]			92.1%

Projected Index Rate

The Allowed Index Rate for the effective period is shown below. It is calculated by taking the Projected Incurred Claims (before ACA adjustments) and dividing it by the allowed modifiers to the Index Rate (i.e., Provider Network) and the Paid to Allowed Ratio.

1. Proposed rates that include the on-going funding of CSRs

	Index Rate Development	PMPM
BI	Projected Incurred Claims (AA)	\$509.96
BJ	Paid to Allowed Ratio	0.697
BK	Network Calibration	0.776
BL	Index Rate	\$943.66

(BI) Projected Incurred Claims

Assumptions that went into Projected Incurred Claims are discussed in detail in the following sections of this memorandum:

Experience Period Premium and Claims
Projection Factors

(BJ) Paid to Allowed Ratio

We expect the paid to allowed ratio of future business to be 0.697. This valuation was calculated based on the member weighted average of the AVs of our 2018 portfolio assuming the expected 2018 membership distribution. The AVs were determined based on the standalone AV calculator which is a paid to allowed calculator.

(BK) Network Calibration

The average network factor was calculated based our expected 2018 population and our proposed 2018 network factors. The calculated value is 0.776.

Market Adjusted Index Rate

After developing the Index Rate, the Market Level Base Rate is calculated as:

1. Proposed rates that include the on-going funding of CSRs

BM	Index Rate PMPM	\$943.66
BN	Federal Reinsurance Program Adjustment	\$0.00
BO	Risk Adjustment	\$92.45
BP	Exchange User Fee Adjustment	\$22.27
BQ	Market Adjusted Index Rate	\$873.48

(BN) Federal Reinsurance Program Adjustment

There is no Reinsurance Program Adjustment.

(BO) Risk Adjustment

This is the negative sum of (AB) Risk Adjustment Estimate and (AK) Risk Adjustment Fee divided by (BJ) Paid to Allowed Ratio and (BK) Network Calibration.

(BP) Exchange User Fee Adjustment

This is (AK) Exchange Fee, divided by (BJ) Paid to Allowed Ratio and (BK) Network Calibration.

(BQ) Market Adjusted Index Rate

This is calculated as:

(BM) Index Rate PMPM – (BN) Federal Reinsurance Program Adjustment - (BO) Risk Adjustment + (BP) Exchange User Fee Adjustment.

The Market Adjusted Index Rate is the rate where all allowable modifiers to the Index Rate: Actuarial Value, Provider Network, Plan Benefits in addition to EHB, Administrative Costs excluding exchange fees are 1.00. It is also the Rate where age factor and area factor are 1.00.

Plan Adjusted Index Rate

After developing the Market Adjusted Index Rate, the Plan Adjusted Index Rate is calculated using the plan specific factors allowed by 45 CFR Part 156, §156.80(d)(2).

1. Proposed rates that include the on-going funding of CSRs

BR	Market Adjusted Index Rate	\$873.48
BS	Actuarial value and cost-sharing adjustment	varies by plan
BT	Provider network, delivery system and utilization management adjustment	varies by plan
BU	Adjustment for benefits in addition to the EHBs	1.000
BV	Impact of specific eligibility categories for the catastrophic plan	varies by plan
BW	Adjustment for distribution and administrative costs	1.130
BX	Plan Adjusted Index Rate	varies by plan

BY	Plan Adjusted Index Rate	varies by plan
BZ	Age Curve Calibration	0.592
CA	Geographic Factor Calibration	1.197
CB	Calibrated Plan Adjusted Index Rate	varies by plan

(BS) Actuarial value and cost-sharing adjustment

The actuarial value and cost-sharing adjustment is the product of the AV of the plan as computed by the standalone calculator, the Induced Demand Factor, and the Normalization Adjustment.

Plan Name	Exchange Status	Actuarial value	Induced Demand	Normalization	Actuarial value and cost-sharing adjustment
Platinum 90 PureCare One EPO	Both	0.912	1.358	0.897	1.110
Gold 80 PureCare One EPO	Both	0.818	1.282	0.897	0.940
Silver 70 PureCare One EPO	Both	0.719	1.169	0.897	0.754
Bronze 60 PureCare One EPO	Both	0.608	1.042	0.897	0.568
Minimum Coverage PureCare One EPO	Both	0.608	1.042	0.897	0.568
Platinum 90 PPO	Off	0.912	1.487	0.897	1.216
Gold 80 PPO	Off	0.818	1.298	0.897	0.952
Silver 70 PPO	Off	0.719	1.134	0.897	0.731
Bronze 60 PPO	Off	0.608	0.951	0.897	0.519
Minimum Coverage PPO	Off	0.608	0.951	0.897	0.519
Platinum 90 EnhancedCare PPO	Both	0.912	1.487	0.897	1.216
Gold 80 EnhancedCare PPO	Both	0.818	1.298	0.897	0.952
Silver 70 EnhancedCare PPO	Both	0.719	1.134	0.897	0.731
Bronze 60 EnhancedCare PPO	Both	0.608	0.951	0.897	0.519
Minimum Coverage EnhancedCare PPO	Both	0.608	0.951	0.897	0.519
Gold Value EnhancedCare PPO	Off	0.781	1.286	0.897	0.900
Silver Value EnhancedCare PPO	Off	0.681	1.134	0.897	0.692

The standard induced demand factors shown here are the same ones used for Broad network in 2017, adjusted for the change in AV from 2017 to 2018, so that the renewal increase is consistent across metals (with the exception of the CSR load for Silver).

PPO	Platinum	Gold	Silver	Bronze	Catastrophic	Gold	Silver
						Alternate	Alternate
Induced Demand	1.487	1.298	1.134	0.951	0.951	1.286	1.134
Induced Demand - 2017	1.476	1.282	1.114	0.913	0.913	N/A	N/A
Change	0.7%	1.3%	1.8%	4.2%	4.2%	N/A	N/A

EPO	Platinum	Gold	Silver	Bronze	Catastrophic
Induced Demand	1.358	1.282	1.169	1.042	1.042
Induced Demand - 2017	1.348	1.266	1.148	1.000	1.000
Change	0.7%	1.3%	1.8%	4.2%	4.2%

(BT) Provider network, delivery system and utilization management adjustment

PureCare One EPO:

The network factors are summarized below:

Area	EPO		Network Factors			PPO Broad Members	Network Factors		
	Members		2017	2018	Change		2017	2018	Change
2	429		0.880	0.863	-2.0%	1,460	1.000	1.019	1.9%
4	263		0.917	0.899	-2.0%	871	1.000	1.019	1.9%
5	596		0.872	0.855	-2.0%	507	1.000	1.019	1.9%
7	359		0.901	0.883	-2.0%	3,716	1.000	1.019	1.9%
8	723		0.955	0.936	-2.0%	2,201	1.000	1.019	1.9%
9	740		0.862	0.665	-22.8%	746	1.000	1.019	1.9%
10	328		0.939	0.920	-2.0%	582	1.000	1.019	1.9%
14	3		0.895	0.877	-2.0%	139	1.000	1.019	1.9%
15	124		0.844	0.827	-2.0%	1,053	1.000	1.019	1.9%
17	64		0.890	0.872	-2.0%	722	1.000	1.019	1.9%
18	148		0.827	0.811	-2.0%	1,971	1.000	1.019	1.9%
19	222		0.823	0.807	-2.0%	1,817	1.000	1.019	1.9%
Total	3,999		0.892	0.841	-5.7%	15,784	1.000	1.019	1.9%

We note that the area factor for PureCare One EPO in region 9 is decreasing substantially due to improved provider contracting with a provider in that region.

EnhancedCare PPO:

We engaged a third party actuarial firm – Milliman – to price the cost differences between our existing Broad Network PPO and the new EnhancedCare PPO product given the contractual agreements for providers who have signed onto the EnhancedCare PPO network as of May 2017. Based on a review of the reimbursement rate differences, Milliman produced network factors the EnhancedCare network.

	EnhancedCare PPO	Network Factors
Area	Members	2018
3	504	0.789
15	17,665	0.669
16	15,209	0.689
17	9,178	0.676
18	17,404	0.769
19	6,137	0.793
Total	66,097	0.714

We note these network factors are set assuming that out-of-network claims for EnhancedCare PPO members will be reimbursed at out-of-network rates (rather than Broad in-network rates when available). We are achieving these discounts based upon contracted reimbursement levels but also based upon the assumption that we can pay for non-emergent costs at levels in our member's evidence of coverage as approved by CDI and for out of area emergency using the Federal methodology for out of area emergency reimbursement.

Not all zip codes in each region are covered. Region 3 in particular does not cover El Dorado County codes. Please see service area template for coverage specific details.

(BU) Adjustment for benefits in addition to the EHBs

There are no benefits in addition to the EHBs.

(BV) Impact of specific eligibility categories for the catastrophic plan

Catastrophic plans are their own single risk pool and this adjustment factor is meant to adjust the catastrophic rates so that they reflect their own experience. Our 2017 catastrophic factor was 0.815 and 0.788 for PPO and EPO plans, respectively. These factors remain unchanged from the previous 2017 rate filing.

(BW) Adjustment for distribution and administrative costs

This is calculated as:

$$1 + \frac{\text{Total Administrative Costs} + \text{Total Taxes \& Fees} - \text{Exchange User Fees} + \text{Profit}}{\text{Projected Incurred Claims w/ ACA Adjustments} + \text{Exchange User Fees}}$$

The resulting adjustment is 1.130

(BZ) Age Curve Calibration

This is the inverse of the expected average age factor using the ACA age factors and the 3 child limit.

The age curve factor was calculated based on our expected 2018 population and the new HHS 2018 age factors. The ACA age factor is based on the member's age in years (rounded down) as of January 1, 2018. The 3 child limit was applied so that dependent children age 0-20 were not counted if they were the 4th or more child in a family contract. The result of this analysis demonstrated that the average age factor for this block is 1.691. Thus to calibrate the plan adjusted index rate so that the implied age factor is 1.00, we multiply by the inverse of the average age factor of the block. The inverse of 1.691 is 0.592.

(CA) Geographic Factor Calibration

This is the inverse of the weighted average of the proposed area factors, weighted by projected 2018 ACA membership. The average area factor was calculated based on this population and using our proposed 2018 area factors. The calculated value is 0.837. The inverse of 0.837 is 1.195.

Note we adjust the calibration factor by 1.002 in order to account for average differences between the renewal produced by the “Rating factors” tab and the renewal calculated by the Rate Development. Therefore the Geographic Factor Calibration is $1.197 = 1.195 \times 1.002$.

AV Metal Values

All AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were entirely based on the 2018 Federal AV Calculator.

AV Pricing Values

Standards plans filed are developed by Covered California. The AVs below are calculated by Covered California and we relied on them without comment.

Alternate plans are developed and priced by Health Net.

Rating Factors

We do not rate for tobacco. Per member premium is calculated as:

Plan Specific Base Rate
x Age Factor with 3 child limit
x Area Factor

Age Factors and Tier Factors:

We use 2018 ACA age factors with the 3 child limit. Due to the change in child age factors, the renewal for members age 0-20 will be higher than the book average while the renewal for members 21+ will be lower than the book average.

Area Factors:

Area factors reflect the regional differences in provider contracting and claims cost. The area factor table was changed in 2018 to renormalize. The net impact to area is 0%. Regional cost variations are to be found in the network factor, as discussed in (BT).

		Area Factor		
Area	Members	2017	2018	Norm.
2	1,889	1.234	1.234	0.991
3	504		1.248	1.002
4	1,134	1.278	1.278	1.026
5	1,103	1.210	1.210	0.972
7	4,075	1.158	1.158	0.930
8	2,924	1.320	1.320	1.060
9	1,486	1.276	1.276	1.024
10	910	1.146	1.146	0.920
14	142	0.943	0.943	0.757
15	18,842	0.915	0.915	0.735
16	15,209		1.118	0.898
17	9,964	0.983	0.983	0.790

Unified Rate Review Template

Section I: Experience period data:

Allowed and Incurred Claims Incurred During the Experience Period:

The single risk pool is comprised of our non-grandfathered Individual PPO and EPO business.

California Individual PPO and EPO incurred claims were pulled directly from Health Net's internal claims system. A completion factor of was applied to account for claims incurred but not reported.

Section II: Allowed Claims, PMPM basis

Other – This is the product of the following factors below. See above Projection Factors (J) – (Z), for further details regarding the quantitative development of these items.

1. Proposed rates that include the on-going funding of CSRs

	Claims development:	Total
	Adjustment to remove Lapsers	0.822
J	OON Substance Abuse Cost Adjustment	0.988
K	2017 OON Deductible and OOPM Changes	0.970
L	Updates: Current Exposure to Substance Abuse / Region / Metal Tie	0.787
N	Age Adjustment	1.102
O	No Attained Age	1.015
P	Area Adjustment	0.918
R	CSR Receivables	0.948
S	Adjustment for Benefits in Addition to EHBs	1.000
T	Adjustment for Grace Period	1.003
X	2017 MLR Initiatives	0.982
Y	2018 MLR Initiatives	0.996
Z	Admin to Claims reclass	1.004
	<i>Equalize Paid to Allowed</i>	1.001
	<i>Equalize Months of Trend</i>	1.000
	<i>Total</i>	0.595

Administrative Expense Load – This is the sum of the following factors below. See above Non-Benefit Expenses and Profit & Risk (AD) – (AF), for further details regarding the quantitative development of these items.

1. Proposed rates that include the on-going funding of CSRs

	Admin Development	% of Revenue
AD	Administrative Expenses	8.4%
AE	Commissions	1.4%
AF	Broker Bonus	0.0%
	<i>Total</i>	9.7%

Profit – See above Non-Benefit Expenses and Profit & Risk for further details regarding the quantitative development of this item.

The 2018 target profit is -1.3%.

Taxes and Fees – This is the sum of the following items below. See above Non-Benefit Expenses and Profit & Risk (AH)-(AN), for further details regarding the quantitative development of these items.

1. Proposed rates that include the on-going funding of CSRs

	Taxes and Fees	% of Revenue
AH	Premium tax	0.0%
AK	Exchange Fee	2.3%
AL	Insurer's Fee	2.4%
AM	PCORI	0.0%
AN	Income Tax	0.6%
	<i>Total</i>	5.3%

Credibility Manual Rate Development

Health Net did not employ the use of external claims experience.

Credibility of Experience

Our California Individual PPO non-grandfathered experience data includes over 18,900 lives and we considered it fully credible for the purpose of premium setting.

Paid to Allowed Ratio

We expect the paid to allowed ratio of future business to be 0.697. This valuation was calculated as the average of the AVs of our 2018 portfolio based on the census of our projected 2018 membership. The AVs were determined based on the standalone AV calculator which is a paid to allowed calculator.

Membership Projections

We project 85,880 members or 1,030,560 member months on 2018 Individual ACA PPO and EPO plans in California.

Warning Alerts

(1) WARNING - Wksh 1 - Market Experience Index Rate For Projection Period (Cell V44) must be less than or equal to Projected Allowed Experience Claims PMPM (w/applied credibility if applicable), After Credibility Total (Cell V32).

In the URRT, the Projected Allowed Experience Claims PMPM field (Cell V32) represents the Projected Incurred Experience Claims PMPM (BI) divided by the projected Paid-to-Allowed Ratio (BJ):

$$\$731.87 = \$509.96 / 0.697$$

Network Calibration (BK) is left out so the URRT correctly calculates the Average Premium PMPM (Cell V43), while maintaining the projected Paid to Allowed Factor (Cell V33) of 0.697.

However, per CDI instructions the Index Rate PMPM (Cell V44) is calculated by dividing the Projected Incurred Claims PMPM (BI) by the projected Paid-to-Allowed Ratio (BJ) with Network Calibration (BK):

$$\$943.66 = \$509.96 / 0.697 / 0.776$$

The Network calibration of 0.776 is the member weighted average of “Provider network, delivery system and utilization management adjustment” – one of the four modifiers to the Index Rate.

This value does not average to 1.000 but to 0.776, so the Index Rate must be divided by 0.776 in order to provide a normalized Index Rate to which the modifiers can be applied.

Effective Rate Review Information (optional)

N/A

Reliance

Health Net did not rely on any information or underlying assumptions provided by another individual.

Actuarial Certification

I, Bryan Curley, am an actuary for Health Net, Inc. I am a member of the American Academy of Actuaries in good standing and meet its qualification standards for actuaries issuing statements of actuarial opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform the work. This filing is prepared to comply with applicable State and Federal Statutes for individual rate filings.

I certify the rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the profession's Code of Professional Conduct. While other ASOPs apply, particular emphasis was placed on the following:

- ASOP No. 5, Incurred Health and Disability Claims
- ASOP No. 8, Regulatory Filings for Health Plan Entities
- ASOP No. 12, Risk Classification
- ASOP No. 23, Data Quality
- ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
- ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
- ASOP No. 41, Actuarial Communications
- ASOP No. 42, Determining Health and Disability Liabilities Other Than Liabilities for Incurred Claims
- ASOP No. 50, Determining minimum value and Actuarial Value under the Affordable Care Act

I certify that to the best of my knowledge and judgment:

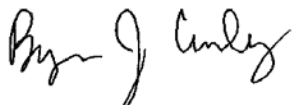

1. The Index Rate for the Projection Period is:
 - a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102)
 - b. Developed in compliance with the applicable Actuarial Standards of Practice
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
 - d. Neither excessive nor deficient based on my best estimates of the 2018 individual market.
2. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
3. The percent of total premium that represents Essential Health Benefits included in Worksheet 2, Sections III and IV was calculated in accordance with actuarial standards of practice. The EHB portion of premium is appropriate as the basis of determining APTCs.
4. The geographic rating factors used reflect only differences in the cost of delivery, and do not include differences for population morbidity by geographic area.
5. The CMS Actuarial Value Calculator was used to determine the AV Metal Values shown in Worksheet 2, Section I of the URRT for all plans.

The URRT does not demonstrate the process used to develop proposed premium rates. It is representative of information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

The information provided in this actuarial memorandum is in support of the items illustrated in the URRT and does not provide an actuarial opinion regarding the process used to develop proposed premium rates. It does certify that rates were developed in accordance with applicable regulations, as noted.

Differences between the projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience.

Note that rates were developed assuming the funding of Advanced Premium Tax Credits (APTCs) and Cost-sharing Reduction (CSR) payments remains intact. The loss of such funding will impact whether rates are sufficient to cover incurred costs. Health Net intends to use the methodology outlined by HHS for advanced Cost-sharing Reduction payments.

 Development of Rate Change or Base Rate

Development of the Index Rate

45 CFR Part 156, §156.80 sets the methodology to determine the Index Rate:

(d) Index rate —(1) In general. Each plan year or policy year, as applicable, a health insurance issuer must establish an index rate for a state market described in paragraphs (a) through (c) of this section based on the total combined claims costs for providing essential health benefits within the single risk pool of that state market. The index rate must be adjusted on a market-wide basis based on the total expected market-wide payments and charges under the risk adjustment and reinsurance programs in the state and Exchange user fees. The premium rate for all of the health insurance issuer's plans in the relevant state market must use the applicable market-wide adjusted index rate, subject only to the plan-level adjustments permitted in paragraph (d)(2) of this section.
