**2017 Rates Table Template v6.0**

All fields with an asterisk (\*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.  
 If you are a community rating state, select Family Option under Age and fill in all columns.  
 If you are not community rating state, select 0-20 under Age and provide an Individual Rate for every age band.  
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.  
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

(Suggested for use as the cover letter required by Title 10, California Code of Regulations §2205.)

<b>TO:</b> State of California Department of Insurance Policy Approval Bureau 45 Fremont Street San Francisco, CA 94105	<b>FROM: (Official Insurer Name):</b> Cigna Health & Life Insurance Company
	<b>Submitter and Complete Mailing Address:</b>  Jennifer Linstone 900 Cottage Grove Road Hartford, CT 06152
	Submission Date: 5/2/16

1. IDENTIFYING FORM NUMBER(S): CACHIND012017 & CACHINDEPO-012017  
 [The form number(s) of one or more of the documents submitted by which the filing can be identified. §2205(a)]

2. DOCUMENT CLASS [The subdivision of 10 CCR §2202(a) which best describes the forms submitted. (§2205(b))

Generic Description and Definition Citation	Check Below	Generic Description and Definition Citation	Check Below
Health Insurance [Hospital, medical, surgical insurance, expense-incurred or indemnity. §2202(a)(1)]	<input checked="" type="checkbox"/>	Credit Life and Disability [§2202(a)(6)]	
Group and Blanket Life and Non-health Disability [(§2202(a)(2)]		Supplemental Life Benefits [§2202(a)(7)]	
Individual Disability, Non-health [§2202(a)(3)]		Variable Life and Annuities [§2202(a)(8)]	
Medicare Supplement [§2202(a)(4)]		Fraternalism [Non-health Disability. §2202(a)(9)]	
Long-Term Care [§2202(a)(5)]		Unclassified [§2202(a)(11)]	

\* Describe briefly (documents other than those described above may have to be filed with other Department Bureaus; see §2206):

3. GROUP AND/OR INDIVIDUAL [Are the forms group, individual or used in both contexts? §2205(b)]

Group Only:	<input type="checkbox"/>	Individual Only:	<input checked="" type="checkbox"/>	Group and Individual:	<input type="checkbox"/>
-------------	--------------------------	------------------	-------------------------------------	-----------------------	--------------------------

4. EMPLOYER SIZE (Employer Health Insurance Only) [Where the forms submitted provide health coverage through employment, the minimum and the maximum sizes of the employers in terms of number of employees §2205(c)]

2 to 50 Employees:	<input type="checkbox"/>	Over 50 Employees:	<input type="checkbox"/>	All Employers:	<input type="checkbox"/>
--------------------	--------------------------	--------------------	--------------------------	----------------	--------------------------

5. REPLACES PREVIOUSLY-APPROVED DOCUMENT(S)? [Do any documents replace previously-approved documents. §2205(d)]

6. FINAL PRINT FORM? [List those documents NOT in the final printed form in which they will be issued to insureds §2205(e)]

Document(s)	Document(s)

7. TYPE OF DOCUMENT WITH WHICH IT WILL BE USED [ For each document (such as a rider) which is designed to be used with another document not included in the filing, a statement of the document class with which it is to be used. §2205(f)]

Document Form Number	Document Class (from Item 2, above)

8. Master Policy Form Number and Approval Date: \_\_\_\_\_

[Where a certificate is submitted for use with a previously approved “group” document, the form number and the filing or approval date of the previously approved group document. §2205(g)]

9. IF ABOVE INFORMATION CANNOT BE FURNISHED, EXPLAIN WHY. [If the submitter is unable to furnish the information requested above, explain why. §2205(h)]

10. REMARKS AND ADDITIONAL INFORMATION (Attach additional sheets if necessary):

SUBMITTER’S SIGNATURE AND TITLE: jennifer.linstone@cigna Digitally signed by

## 1. GENERAL INFORMATION

Insurance Company Name	Cigna Health & Life Insurance Company
NAIC Company Code	67369
HIOS Issuer ID	40025
State	California
Market Type	Individual
Proposed Effective Date	01/01/2017
Primary Contact Person and Title	Minhe Yu, FSA, MAAA, Actuarial Manager
Primary Contact Telephone Number	(860) 226-0342
Primary Contact Email	<a href="mailto:Minhe.Yu@Cigna.com">Minhe.Yu@Cigna.com</a>

**Scope and Purpose of Filing:** Cigna Health & Life Insurance Company (CHLIC) is filing rates for comprehensive major medical products 40025CA002 and 40025CA006 for individuals & families, to be effective January 1, 2017. The plans represented in this filing will be Guaranteed Issue & Guaranteed Renewable and are to be marketed through brokers, general agents, and directly to consumers as described in the policy forms. These plans are attached to an existing product that has been submitted under policy form filing CACHIND012017, and a new product that has been submitted under policy form filing CACHINDEPO-012017. These policy forms are not subject to medical underwriting. Please note that the content of this filing is intended to be reviewed by an actuary.

## 2. PROPOSED RATE INCREASE

The proposed weighted average annual rate changes by product, without the impact of aging, are provided below. The rate change reflects the weighted average rate change for all 2016 plans being mapped into a 2017 plan. Section 21 provides the detailed mapping of terminating plans to 2017 plans that was used for the development of the proposed rate change.

2017 HIOS Product ID	40025CA006	40025CA002
Proposed Rate Increase	14.0%	-0.6%

Please note that the Proposed Rate Change above does not equal the Product Rate Increase shown in Section I, Worksheet 2 of the URRT. As stated on page 37 of the Unified Rate Review Instructions, the Product Rate Increase Percent (over Experience Period) of 0.0% for 40025CA006 and -1.08% for 40025CA002 in the URRT reflect the average rate increase of the renewing plans only. This field is calculated by the template and does not include the impact on membership mapped from a terminated plan to a new or renewing plan.

The following factors are the main drivers of the proposed rate change:

- Medical inflation and unit cost changes of medical services year over year: The underlying claim costs are expected to increase from 2016 to 2017, which is reflective of anticipated changes in the prices of medical services, the frequency with which consumers utilize services, as well as any changes in network contracts or provider payment mechanisms.
- The non-grandfathered individual marketplace is evolving in light of the material segment changes initiated by the Patient Protection and Affordable Care Act (PPACA), such as the introduction of the guaranteed issue requirement, modified community rating, subsidies, the risk adjustment program, and many other provisions. After consideration for expected risk adjustment transfers, the single risk pool experience for CHLIC in California was more adverse than assumed in the current rates. As a result, CHLIC's best estimate of the average market-wide morbidity of the covered population has increased compared to 2016.
- Transitional Reinsurance Program Changes: As proposed in the 2017 HHS Notice of Benefits and Payment Parameters, the reinsurance program will end with the 2016 benefit year. Consequently, there will be no reduction in claim costs due to the program in 2017, driving an increase in premiums compared to 2016.
- Plan design changes and benefit modifications: Changes have been made to certain plans that are resulting in a decrease in expected cost share and therefore a decrease to premium. All plan designs conform to actuarial value and essential health benefit requirements.
- Health Insurance Industry Fee Changes: The suspension of the HII Fee for 2017 results in a decrease to premium compared to 2016.

The requested rate change is not the same across all plans. The following factors drive different rate changes by plan:

- Plan design changes and benefit modifications
- Trend leveraging due to member cost sharing provisions
- CHLIC has made refinements to the manual rating methodology and refreshed the claim probability distribution (CPD) used in the development of the cost sharing for its plans based on its most recent group experience, which leads to different cost share and expected claim cost changes among plans
- CHLIC has updated the data and methodology used to project changes to customer utilization patterns as a result of changes in cost sharing

### 3. EXPERIENCE PERIOD PREMIUM & CLAIMS

- a. **Paid Through Date:** December 31, 2015
- b. **Premiums in Experience Period:** Premiums in experience period represent actual 2015 premiums received through 12/31/2015 plus expected risk adjustment transfers. CHLIC anticipates a PPACA MLR greater than 80% in 2015 and therefore estimates no MLR rebates payable.
  - i. Prior to MLR Rebates: \$107,712,102
  - ii. Expected MLR Rebates: None
  - iii. Net of MLR Rebates: \$107,712,102

- c. **Allowed & Incurred Claims:**

All claims are processed through CHLIC’s claim system. Allowed claims shown below represent the sum of payments made under the policy to healthcare providers.

IBNR claims are calculated using completion factors, which represent the known paid claims as a percent of the estimated total accrual as of a particular lag period after a service month. Completion factors for a given reporting period are developed based on historical run-out patterns for national Individual experience, adjusted for actuarial judgment regarding deviance from the average (within a reasonable range based on historical deviance). The methodology used to calculate IBNR does not differ for allowed claims versus incurred claims.

Allowed and incurred claims in the experience period are as follows:

Allowed Claims	
Paid Through 12/31/2015	\$140,958,091
IBNR	\$16,037,007
Completed Allowed Claims	\$156,995,098

Paid & Incurred Claims	
Paid Through 12/31/2015	\$102,506,856
IBNR	\$12,323,526
Incurred Claims	\$114,830,382

### 4. BENEFIT CATEGORIES

To determine benefit categories, CHLIC uses a combination of Procedure Code and Place of Service to categorize each claim under an appropriate Major Service Category. These categories are defined as follows:

- **Inpatient Hospital:** Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.
- **Outpatient Hospital:** Includes non-capitated facility services for surgery, emergency room, lab, radiology, therapy, observation and other services provided in an outpatient facility setting and billed by the facility.
- **Professional:** Includes non-capitated primary care, specialist, therapy, the professional component of laboratory and radiology, & other professional services, except hospital based professionals whose payments are included in facility fees.

- Other Medical: Includes non-capitated ambulance, home health care, DME, prosthetics, supplies, vision exams, dental services and other services.
- Prescription Drug: Includes drugs dispensed by a pharmacy, net of rebates received from drug manufacturers.

## 5. PROJECTION FACTORS

The Projection Factors described below are included in Section II, Worksheet 1 of the URRT.

- Changes in the Morbidity of the Population Insured: Experience was adjusted to account for expected morbidity differences between the underlying experience population and the projected 2017 population. The morbidity adjustment factor accounts for morbidity drivers specific to CHLIC's single risk pool, including the membership distribution by metal tier, and network type. The morbidity adjustment factor also accounts for expected market-wide morbidity changes due to stronger individual mandate, and increased awareness of Individual health insurance products.
- Changes in Benefits: The adjustment for changes in benefits was derived by comparing the average manual allowed claim cost for the 2017 product portfolio, weighted by projected 2017 membership by plan, to the average manual allowed claim cost for the 2015 product portfolio, weighted by 2015 CHLIC experience membership by plan. This adjustment captures anticipated changes in average utilization of services due to differences between the average member cost-sharing during the experience period and the expected average member cost-sharing in the projection period. This adjustment also reflects any additions or removals in benefits due to changes in essential health benefits and/or state required benefits.
- Changes in Demographics: An adjustment was made to account for the change in distribution by age and gender between the 2015 underlying experience and the expected 2017 membership. The adjustment factor was developed as the ratio of the membership-weighted average demographic factor using 2017 projected membership, and a similar factor computed using the 2015 actual membership. An area adjustment was also made to reflect differences between the distribution of membership across rating areas in our experience population and our 2017 projected population.
- Trend Factors: The source data to determine the trend is national group experience adjusted for market-specific differences. Adjustments were made to account for differences in utilization across major service categories and differences in the formulary between group and individual. CHLIC's 2015 single risk pool experience is trended forward two years to 2017. The trend for group is deemed appropriate for use in development of individual rates because the networks constructed for group and individual are similar, and any differences in network are captured by a separate network savings decrement.

## 6. CREDIBILITY MANUAL RATE DEVELOPMENT

### a. Source & Appropriateness of Experience Data used in Developing the Manual Rate

The source data used to generate the Manual Rate is trended national group experience adjusted for state- and market-specific differences. The experience for the national group book of business is deemed appropriate for development of the Manual Rate because the baseline experience was not subject to individual medical underwriting and the benefits for the group experience are similar to the benefits required to be ACA compliant. The adjustments to the baseline data are addressed below.

### b. Adjustments made to the Data

The following adjustments were made during the development of the Manual Rate to account for differences between the source data and characteristics of the anticipated population in the Individual Market for the proposed period:

- Morbidity Load – A 41.5% load was added to the manual rate to account for the difference in morbidity risk of the population underlying the manual rate and the anticipated Individual population in 2017. CHLIC relied on full-year 2015 allowed claims and enrollment data for the Individual market. The morbidity load comprehends the following components:
  - Overall health status in the Individual marketplace – Customers seeking coverage through the Individual market tend to have a different average health status than those who receive coverage through their employer. The average morbidity in the Individual market is driven by external factors such as the strength of the individual mandate, overall awareness of Individual health insurance products, and the presence or absence of transitional policies. All such factors are included in the morbidity load.

- Membership distribution by metal tier – In the Individual market, individuals tend to select plans that best meet their health needs. Riskier individuals tend to choose plans with lower member cost-share. The expected membership distribution by metal tier therefore impacts the overall expected morbidity in the single risk pool. This adjustment is applied to the index rate only and no plan-specific adjustments are made to account for anticipated differences in health status of enrollees across plans.
  - Demographic Adjustment – The experience underlying the Manual Rate development does not conform to the 3:1 age slope as prescribed by the ACA. Hence, an adjustment was made to reflect the impact of compression of age slopes as well as to account for the different distribution by age in the 2017 individual market than the distribution by age reflected in the data underlying the Manual Rate.
  - Impact of EHB – Most EHBs are already represented in the base experience underlying the derivation of the Manual Rate. However, certain EHBs are not represented in the base experience and the impact of covering these benefits is subsequently added to the Manual Rate, resulting in a 1.1% load.
  - Network Savings – CHLIC’s underlying network for its proposed plans in this filing is different from the network underlying the experience used in deriving the Manual Rate. The estimated savings of the provider network vary by geographic region, but are incorporated into the Manual Rate based on assumed enrollment by region as an average 11.1% decrement for 2017.
  - Pharmacy Formulary Savings – Pharmacy claim cost experience used in the development of the Manual Rate is based on national group experience. This group experience is representative of a broader formulary than the formulary associated with CHLIC’s individual product. The narrower formulary results in a savings of 24.2% on pharmacy claim costs compared to the Manual Rate.
- c. Inclusion of Capitation Payments**

There are no services provided under a capitation arrangement for plans included in this filing.

## 7. CREDIBILITY OF EXPERIENCE

Limited fluctuation credibility was used to determine the credibility assigned to the 2015 single risk pool experience. 2015 exposure of 100,000 member months was assigned 100% credibility. Therefore, the credibility assigned to 2015 single risk pool experience was 100%.

## 8. PAID TO ALLOWED RATIO

The expected cost-sharing ratio for each benefit plan is calculated by using group experience trended to the proposed filing period to develop a claims probability distribution (CPD). This CPD is then used to estimate member cost-share vs. issuer cost-share for each benefit category and benefit plan. The Paid-to-Allowed Ratio is derived by applying expected distribution of business by benefit plan to the cost-sharing estimates. The expected Paid-to-Allowed Ratio for the 2017 single risk pool is 76.4%.

Some differences exist between the cost-sharing as calculated above and the Metal AVs that are described in Section 18 of this document. These dissimilarities exist as a result of the following differences in methodology:

- The CPD used to calculate member and insurer cost-share is different from the underlying claims distribution in the continuance tables of the AV Calculator. The continuance tables are based on the default standard population developed by HHS using claims and enrollment from a national commercial database. The CPD is based on claims and enrollment data from CHLIC’s national group book of business. This experience-based CPD has a larger volume of its distribution at the tail, which represents higher average costs.
- The underlying cost assumptions for copays are different in the AV Calculator as compared to CHLIC’s experience. Since most of the proposed plans represented in this filing have copay based cost-sharing for Primary Care Physician and Specialist office visits and some plans have copays on additional services, this causes a difference between the Paid-to-Allowed ratio and the Metal AV for most plans.
- The AV Tool only accounts for in-network benefits, whereas the paid-to-allowed ratio incorporates the impact of out-of-network benefits as well.

- Cost-sharing for other benefits, such as separate copays for urgent care, is not captured in the AV Tool, whereas CHLIC takes these benefits into account when deriving the paid-to-allowed ratio

Note that the Paid-to-Allowed ratio as shown above is CHLIC’s best-estimate of the total expected paid claims that are the liability of CHLIC, divided by the total expected allowed claims for the Projection Period, for the population anticipated to be covered in the Projection Period. The URRT does not accurately demonstrate the process used by CHLIC in the development of rates. As a result, in order to accurately reflect CHLIC’s Projected Allowed Experience Claims, Single Risk Pool Gross Average Premium, Risk Adjustment, and Expense assumptions in the URRT, an adjustment factor of 0.1% was applied to the Paid-to-Allowed ratio in Worksheet 1, cell V33 of the URRT.

## 9. RISK ADJUSTMENT & REINSURANCE

### a. Experience Period Risk Adjustment and Reinsurance Adjustments (PMPM)

Reinsurance recoveries for 2015 were estimated by applying the reinsurance parameters as outlined in the 2015 Notice of Benefits & Payment Parameters to 2015 CHLIC member-level experience in California. Projected reinsurance recoveries on IBNR claims was also estimated based on actual 2015 experience.

The expected member-level risk transfer amounts for 2015 were calculated based on 2015 CHLIC experience in California and proprietary data obtained from Wakely Consulting Group. CHLIC-specific risk scores and other transfer formula components were calculated internally in accordance with the Notice of Benefit and Payment Parameters for 2015 final rule (CMS-9954-F). Internal data was then combined with data obtained from Wakely Consulting Group, which estimated the various market-level components of the risk transfer formula based on actual data received from carriers in California, to arrive at a final estimate for 2015 risk transfer.

### b. Projected Risk Adjustments (PMPM)

A 2017 net risk transfer receivable of \$15.54 PMPM is assumed. This total includes a projected risk transfer receivable of \$15.71 PMPM and risk adjustment user fees of \$0.17 PMPM, both on an allowed basis. Equivalently, the projected risk transfer on a paid basis is \$12.01 PMPM receivable with risk adjustment user fees of \$0.13 PMPM.

To model expected 2017 risk transfer dynamics, 2015 member-level risk transfer amounts were projected based on 2015 nationwide CHLIC experience using all components of the HHS risk transfer formula. In order to develop these risk transfer amounts, corresponding market-level estimates of the 2015 risk transfer formula were obtained from proprietary data from Wakely Consulting Group, which estimated the market-level components of the risk transfer formula based on actual data received from carriers in a given market. The expected 2015 risk transfers were adjusted to account for expected changes as a result of moving to the initially proposed 2017 risk adjustment model. Finally, the projected 2017 risk transfer amounts were calculated based on these 2015 risk transfers further adjusted for:

- a) The expected 2017 morbidity of CHLIC’s single risk pool relative to the expected market-average morbidity in California, as outlined in Section 5 of this document
- b) The average paid-to-allowed ratio as outlined in Section 8 of this document, to provide final estimates on an allowed basis for development of the market adjusted index rate

The projected 2017 net allowed risk transfer receivable of \$15.54 PMPM was applied to the Index Rate in the development of the market average index rate and does not match cell V35 on Worksheet 1 of the URRT, which is on a paid basis. The impact of net risk adjustment is a reduction of 3.2% of CHLIC’s 2017 premiums.

CHLIC does not anticipate any fees or receipts from the risk corridor program in 2017 and has not included any pricing adjustments for risk corridor payments in rate development.

### c. Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

As proposed in the 2017 HHS Notice of Benefits and Payment Parameters, the reinsurance program will end with the 2016 benefit year. Consequently, no reinsurance recoveries have been applied to the Index Rate in the development of the Market Average Index Rate.

## 10. NON-BENEFIT EXPENSES, PROFIT, & RISK

The following table illustrates anticipated breakdown of the retention components. It should be noted that the administrative expenses below reflect that CHLIC is pricing to scalable membership. Hence, these expenses reflect the amount that will be incurred if CHLIC attains scale, which is not anticipated for the rating period. In the current rating period, CHLIC has applied non-benefit expenses, profit & risk load as a constant percentage of premium to all plans. This equates to 19.0% and is derived based on the projected expenses as a portion of projected average statewide premium with a target loss ratio of 81.0%. Actual expenses on both a PMPM and percentage of premium basis will vary based on the actual size and distribution of membership by age and plan.

Retention Component	% of Premium
Administrative Expense	12.7%
Profit Margin	2.5%
Taxes & Fees (including ACA expenses)	3.7%
<b>Total Retention</b>	<b>19.0%</b>

### a. Administrative expense load

CHLIC's non-medical expenses are split out as follows:

- Acquisition administrative expense – this includes, but is not limited to, incentive compensation & salaries for brokers and agents, commissions<sup>†</sup>, marketing costs (working media & non-working media), and vendor fees.
- Recurring administrative expense – this includes, but is not limited to, costs relating to customer analytics, service operations, account management, and corporate overhead.

The administrative expense load is based on internal estimates from CHLIC's Financial Analysis team and is deemed appropriate for the plans proposed in this filing. To determine this load, membership for CHLIC's benefit plans is projected as outlined in Section 20. This membership is then applied to known budgeted amounts for administrative expenses to determine an appropriate administrative load across all plans as a percentage of premium allocation. The administrative expense load was applied uniformly as a percentage of premium and do not vary by plan or product.

<sup>†</sup> Commissions vary based on distribution channel and plan. Since premium rates for plans must be the same across all channels, CHLIC has averaged its commissions based on expected membership distribution by acquisition type.

### b. Profit & Risk Margin

CHLIC has targeted a 2.5% profit margin that is built into its premium rates. This target is based on CHLIC attaining scalable membership, which is not expected for the rating period. In the event that actual membership size and distribution differs from expectations, the actual profit margin may vary. There is no additional risk margin load.

### c. Taxes & Fees

Please note that this section excludes contributions to the risk adjustment user fees, since these fees are included in the projected risk transfer, per Section 4.4.8 of the 2017 Unified Rate Review Instructions.

- Premium Tax is applied as 2.35% of premium
- PCORI Fee is applied as \$2.26 PMPY or 0.04% of premium

## 11. PROJECTED LOSS RATIO

The projected 2017 PPACA MLR, without adjustment for credibility, for CHLIC's individual products is 84%.

A demonstration of the projected MLR calculation is illustrated below:

PPACA 2017 MLR		
1	Member Months	154,633
2	Incurred Claims	\$ 56,992,870
3	Claims Adjustment*	\$ (1,684,803)
4	<b>Numerator (2 + 3)</b>	\$ 55,308,067
5	Earned Premium	\$ 68,071,467
6	Premium Adjustment**	\$ (2,550,810)
7	<b>Denominator (5 + 6)</b>	\$ 65,520,657
8	Credibility Factor	2%
9	Average Deductible Factor	128%
10	Credibility Adjustment (8 x 9)	3%
11	<b>PPACA MLR w/o Credibility (4 ÷ 7)</b>	84%
12	<b>PPACA MLR w/ Credibility (10 + 11)</b>	87%

\* Quality Improvement Activities, Risk Adjustment & Risk Corridor Receipts

\*\* Premium/Payroll/Federal Income Tax and ACA Fee Adjustments

Figures in the PPACA MLR exhibit have been calculated as follows:

- Member Months – projections for member months are developed internally as best estimates generated by applying current market share percentages and additional adjustments to take into account the addressable market opportunity. This figure ties to Cell X47 in Worksheet 1 URRT.
- Incurred Claims – projections for incurred claims are consistent with Cell X34 in Worksheet 1 of the URRT.
- Claims Adjustment – defined as specified by HHS Notice of Benefit & Payment Parameters for 2017 (Final Rule)
- Earned Premium – projections for earned premium are developed by applying the projected average rate PMPM from cell V43 in Worksheet 1 of the URRT to the expected member months projections specified earlier.
- Premium Adjustment – defined as specified by HHS Notice of Benefit & Payment Parameters for 2017 (Final Rule)
- Credibility Adjustment – The credibility adjustment is calculated using the methodology specified in 45 CFR 158.232. This adjustment incorporates the impact of the base credibility factor and the average deductible factor.

## 12. SINGLE RISK POOL

CHLIC has included all covered lives for every non-grandfathered product/plan combination in the individual market in California in the single risk pool, as specified in 45 CFR 156.80(d). Please note that CHLIC does not have any transitional policies.

## 13. INDEX RATE

The Index Rate of the Experience Period for this filing is \$538.00. The Index Rate of the Experience Period in Section I, Worksheet 1 of the URRT represents the total combined 2015 allowed claims experience PMPM attributable to Essential Health Benefits in the single risk pool. It is consistent with the Experience Period Allowed Claims PMPM, as shown in Section II, Worksheet 1 of the URRT, since no benefits in addition to EHBs were offered in the experience period.

The Index Rate for the Projection Period for this filing is \$482.56 and was developed in accordance with 45 CFR Part 156.80(d). The Index Rate for the Projection Period identified in Section III, Worksheet 1 of the URRT was generated using the same methodology as used in determining the Single Risk Pool Gross Premium Average Rate in Cell V43 of Worksheet 1 in the URRT. Hence, the Projected Index Rate is a representation of the Expected Allowed Claims for 2017 attributable to Essential Health Benefits, and incorporates the impact of trend, benefit, morbidity, and demographic adjustments as outlined in Sections 5 and 6 of this document. Refer to Section 7 of this document for additional information regarding the credibility attributed to single risk pool experience in the development of the Index Rate for the Projection Period. There are no benefits in addition to EHBs that are being covered under the proposed plans in 2017. No consideration is granted to the expected impact of specific eligibility categories for catastrophic plans because these plans are not being proposed in this filing.

#### 14. MARKET ADJUSTED INDEX RATE

The Market Adjusted Index Rate for this filing is \$467.02. The Market Adjusted Index rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80 (d)(1). The following market-wide adjustments have been made to the Index Rate, as allowed under these rules:

- Risk Transfer - The Index Rate has been adjusted for the net transfer from the risk adjustment program. This adjustment equates to an impact of \$15.54 PMPM on the Index Rate.

Please refer to Risk Adjustment and Reinsurance Section (section 9) for detailed explanation of how the Risk adjustment was developed.

The Market Adjusted Index Rate reflects the average demographic characteristics of the single risk pool and is not calibrated.

#### 15. PLAN ADJUSTED INDEX RATE

##### a. Plan Adjusted Index Rate for the Projection Period

Only the following allowable modifiers (as specified in 45 CFR 156.80(d)) have been used to adjust the Market Adjusted Index Rate to arrive at the Plan Adjusted Index Rates:

- Plan-specific actuarial value and cost sharing adjustments
- Administrative costs, excluding the Risk Adjustment User Fee

The adjustment Impact of specific eligibility categories for the catastrophic plan is not applicable since CHLIC does not plan to offer catastrophic plans in 2017.

Note that the AV and cost-sharing adjustment encompasses expected cost-sharing differences, utilization differences due to differences in cost-sharing.

The expected cost-sharing ratio for each benefit plan is calculated by using group experience over the experience period (trended to the proposed filing period) to develop a claims probability distribution (CPD). This CPD is then used to estimate member cost-share vs. issuer cost-share for each benefit category and benefit plan.

In addition to cost sharing differences, this adjustment also includes utilization differences due to differences in cost sharing. In evaluating adjustment for utilization changes, CHLIC has relied on internal studies that used regression analysis at the major service category level, to develop a relationship between historical utilization and corresponding expected cost-sharing. This adjustment is consistent with the description on page 62 of the 2017 Unified Rate Review Instructions. There are no explicit and/or additional adjustments used in our rate development process that reflect expected differences in utilization due to health status.

##### b. Plan Adjusted Index Rate for the Experience Period

The Plan Adjusted Index Rate for the Experience Period has been included in row 55 on Worksheet 2 of the URRT. This represents the expected non-calibrated statewide average premium for a non-tobacco user based on expected membership at time of 2015 Pricing. The Plan Adjusted Index Rate for the Experience Period differs from the average premium rate in Section I of Worksheet 1 due to the following item:

- Differences between projected and actual 2015 membership by age and geography

#### 16. CALIBRATION

CHLIC calibrates the Plan Adjusted Index Rates to apply the allowable rating factors (age and geography) in order to calculate Consumer Adjusted Premium Rates. The calibration for each allowable rating factor is described below.

##### a. Age Curve Calibration

The weighted average age factor for the projected membership was calculated using the Default Federal Standard Age Curve. The average age associated with this projected membership (rounded to the nearest whole number) is 42. This single risk pool average age was determined using the current 2016 age distribution in the single risk pool. The Plan Adjusted Index Rate was divided by the weighted average age factor mentioned above, to arrive at the calibrated Plan Adjusted Index Rate for a 21 year old. A demonstration of how the Plan Adjusted Index Rate and the age curve were used to generate the calibrated Plan Adjusted Index Rate for each plan is provided below.

**b. Geographic Factors**

Rate variations among geographical areas vary only by the geographic rating regions defined by the federal government. Area factors reflect only differences in the cost of the delivery of medical services among rating areas for a standard population and fixed market basket of covered services. The following table shows the geographic factors for each defined area in California:

Area	4	5	6	7	8	15	16	17	18	19
Area Factor	1.19	1.14	1.14	1.13	1.23	0.89	1.00	0.91	1.05	1.05
Membership	4.6%	4.3%	7.3%	14.1%	4.1%	7.0%	27.0%	6.7%	12.7%	12.2%

An average geographic factor is developed based on the projected distribution of membership across all areas. Then the calibrated Plan Adjusted Index Rate is calculated as Plan Adjusted Index Rate divided by this weighted average geographic factor.

A demonstration of calibration for the Plan Adjusted Index Rate is provided in the table below.

Plan Name	HIOS Plan ID	PAIR	Geographic Calibration	Demographic Calibration*	Calibrated PAIR
Cigna California PPO Bronze	40025CA0020001	\$329.91	0.95	0.75	\$234.82
Cigna California Bronze	40025CA0060001	\$331.56	0.95	0.75	\$235.99
Cigna LocalPlusIN 6000	40025CA0060006	\$350.03	0.95	0.75	\$249.14
Cigna California HSA Bronze	40025CA0060002	\$355.51	0.95	0.75	\$253.04
Cigna California Silver	40025CA0060003	\$474.60	0.95	0.75	\$337.80
Cigna LocalPlusIN HSA 2900	40025CA0060008	\$430.94	0.95	0.75	\$306.73
Cigna LocalPlusIN 2250	40025CA0060007	\$436.24	0.95	0.75	\$310.50
Cigna California Gold	40025CA0060004	\$657.40	0.95	0.75	\$467.92
Cigna California Platinum	40025CA0060005	\$799.37	0.95	0.75	\$568.97

\* The Plan Adjusted Index Rate represents average premium for the projected single risk pool at the unrounded average age, weighted using the best-estimate Default Federal Standard Age Curve factors. Linear interpolation between integer Default Federal Standard Age Curve factors was used in the development of the Demographic Calibration factor.

**17. CONSUMER ADJUSTED PREMIUM RATE**

Consumer Adjusted Premium Rate is developed by applying the following allowable adjustments to the calibrated Plan Adjusted Index Rate.

- Individual and family tier – applied by summing the premiums for each individual family member, provided at most three child dependents under age 21 are taken into account
- Rating area factor – applied by multiplying the area factors to the calibrated Plan Adjusted Index Rate
- Age factor – applied by multiplying the age factor to the calibrated Plan Adjusted Index Rate

**18. AV METAL VALUES**

The AV Metal Values shown in Worksheet 2 of the URRT for the plans listed below were based on the AV Calculator, with the exception of the following unique benefits for select plan designs:

- Cost-Sharing for Pharmacy Retail vs. Home-Delivery Service
- Copays for Inpatient Services
- Cost Sharing for Mental Health/Substance Abuse Outpatient Office Visit vs. Facility Visit Services
- Cost Sharing for Telehealth
- Copays for Urgent Care Services

These benefits were outside the scope of the AV Calculator and hence an alternate methodology was deemed necessary as per 45 CFR 156.135(b). The impacted plans, alternate methodologies, and the reason for their use is explained in the accompanying actuarial certification titled “Unique Plan Design Supporting Documentation & Justification”.

40025CA0060008

### 19. AV PRICING VALUES

A demonstration of the development of the Plan Adjusted Index Rate from the Market Adjusted Index Rate is provided table below.

HIOS Plan ID	MAIR	Actuarial Value and CS	Network, Delivery, and UM	Benefits in Addition to EHB	Catastrophic Plans	Distribution and Admin Costs	PAIR
40025CA0020001	\$467.02	0.57	1.00	1.00	1.00	1.23	\$329.91
40025CA0060001	\$467.02	0.58	1.00	1.00	1.00	1.23	\$331.56
40025CA0060006	\$467.02	0.61	1.00	1.00	1.00	1.23	\$350.03
40025CA0060002	\$467.02	0.62	1.00	1.00	1.00	1.23	\$355.51
40025CA0060003	\$467.02	0.82	1.00	1.00	1.00	1.23	\$474.60
40025CA0060008	\$467.02	0.75	1.00	1.00	1.00	1.23	\$430.94
40025CA0060007	\$467.02	0.76	1.00	1.00	1.00	1.23	\$436.24
40025CA0060004	\$467.02	1.14	1.00	1.00	1.00	1.23	\$657.40
40025CA0060005	\$467.02	1.39	1.00	1.00	1.00	1.23	\$799.37

CHLIC is not incorporating any impact due to the different morbidity or health status of individuals who select certain plans in the derivation of the Pricing AV. See Section 15 in this document for an explanation of the factors used in the development of the Pricing AV.

### 20. MEMBERSHIP PROJECTIONS

The membership projections for CHLIC’s benefit plans are developed internally as best estimates. They were derived from CHLIC 2016 open enrollment experience and assumed channel growth in California. Active membership splits were used to develop projections by metal tiers, together with growth assumptions by channel. The projected distribution of member months represents our expectation of the industry average distribution of enrollment by age for the Individual Market for 2017.

### 21. TERMINATED PRODUCTS

The table below shows the plan mapping for terminating plans to new or existing plans in 2017.

**Table 1: Terminated Plans from the Experience Period**

2015 HIOS ID	2016 HIOS ID	2017 HIOS ID
40025CA0020002	40025CA0020002	40025CA0060006
40025CA0020003	40025CA0020003	40025CA0060006
40025CA0020004	40025CA0020004	40025CA0060003
40025CA0020005	40025CA0020005	40025CA0060008
40025CA0020006	40025CA0020006	40025CA0060007
40025CA0020007	40025CA0020006	40025CA0060007
40025CA0020008	40025CA0020008	40025CA0060004
40025CA0020010	40025CA0020008	40025CA0060004
40025CA0020011	40025CA0020011	40025CA0060005

**22. PLAN TYPE**

The plan types as inputted in Section I, Worksheet 2 of the URRT accurately describe the plans in this filing.

**23. WARNING ALERTS**

Rows 57 – The Plan Adjusted Index Rate and Total Premium for the Experience Period differs from the average premium rate in Section I of Worksheet 1 due to differences in projected versus actual distribution of membership by age and geography as well as differences in projected versus actual risk adjustment transfers. See Section 15 in this document for additional information regarding the Plan Adjusted Index Rate for the Experience Period.

Row 68 & 73 – Per Worksheet 2 of the URRT, the Total Incurred claims payable with issuer funds equals allowed claims less all allowed claims which are not the issuer’s obligation, including member cost-sharing, reinsurance and risk adjustment receivables or payables, and cost-sharing paid by HHS on behalf of low-income members. However, page 14 of the Universal Rate Review Instructions indicates that the Incurred Claims in Experience Period, as shown on Worksheet 1 of the URRT, is allowed claims less member cost-sharing and cost-sharing paid by HHS on behalf of low-income members. Therefore, cell F15 on Worksheet 1 of the URRT is not adjusted for expected receipts or payments for the reinsurance or risk adjustment programs for 2015, while rows 68 and 73 on Worksheet 2 are adjusted for these payments.

**24. EFFECTIVE RATE REVIEW INFORMATION****a. Financial Information**

<b>Cigna Health &amp; Life Insurance Company (CHLIC)</b>					
<i>(\$ Millions)</i>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016 (Proj)</b>
<b>Post-Tax Stat Net Income</b>	301	489	1,047	1,187	1,353
<b>Stat Capital &amp; Surplus</b>	1,018	1,714	2,800	3,009	3,486
<b>Asset Valuation Reserve</b>	22	45	97	148	150
<b>Authorized Control Level RBC</b>	172	355	480	566	656
<b>Dividend History</b>	0	0	0	750	1,050
<b>Return on Equity</b>	38%	35%	46%	41%	42%

CHLIC is in strong financial condition. The YE 2015 ACL RBC ratio was 558%. In prior years when the company was significantly smaller, the RBC ratio was much higher. For the next few years, CHLIC is expected to maintain an ACL RBC ratio around 550%. The proposed plans and rates will have an immaterial impact on the company’s financial condition, even with significant membership growth.

**b. Rating Information**

To see the proposed rate manual by age, area and smoking status please reference the accompanying QHP Rate Table Template. For additional rating rules used in deriving the premium please refer to the accompanying Business Rules Template.

A description of the benefits for all plans proposed in this filing is shown in the accompanying Plans Benefits Template.

Please note that CHLIC shall satisfy the requirement to offer coverage for all essential health benefits off-exchange by providing all applicants a medical policy that covers the pediatric dental benefit.

**c. Other**

CHLIC’s anticipated loss ratio (without ACA adjustments) for the proposed plans in this filing is 81.0%.

**25. RELIANCE**

I have relied on data and analysis provided by Harsh Mota, Actuarial Senior Analyst, in developing the proposed premium rates and in preparing the Part 1 Unified Rate Review Template submission. I have also relied on claim, premium, enrollment, and risk score data supplied by Lyn Dills, Analytics Senior Specialist, and Allyssa Ward, Actuarial Specialist. The data have been reviewed for reasonableness but have not been audited. In addition, I have relied on other internal and external sources, including data provided by Wakely Consulting, to develop the underlying assumptions used in the pricing methodology.

**26. ACTUARIAL CERTIFICATION**

I, Minhe Yu, am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I certify, to the best of my knowledge and judgment, that:

- a) The rates proposed in the above noted rate filing are
  - In compliance with all applicable State & Federal Statutes & Regulations (45 CFR 156.80(d)(1))
  - Developed in compliance with applicable Actuarial Standards of Practice, including but not limited to the following:
    - ASOP #5, Incurred Health & Disability Claims
    - ASOP #8, Regulatory Filings for Health Plan Entities
    - ASOP #12, Risk Classification
    - ASOP #23, Data Quality
    - ASOP #25, Credibility Procedures Applicable to Accident & Health, Group Term Life, and Property & Casualty Coverages
    - ASOP #26, Compliance with Statutory & Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    - ASOP #41, Actuarial Communications
  - Reasonable in relation to the benefits provided and the population anticipated to be covered
- b) The Projected Index Rate presented in this filing is:
  - a. In compliance with all applicable state and Federal statutes and regulations in 45 CFR 156.80(d)(1)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- c) Plan level rates were generated using only the index rate and allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2)
- d) The geographic rating factors reflect only differences in the costs of delivery, including unit cost and provider practice pattern differences, and do not include differences for population morbidity by geographic area.
- e) The percent of total premium that represents Essential Health Benefits included in Worksheet 2, Section IV, of the Part 1 URRT was calculated in accordance with applicable Actuarial Standards of Practice
- f) The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans, save the exceptions shown in Section 18, which are further explained in the accompanying actuarial certification “Unique Plan Design Supporting Documentation & Justification”.

The URRT does not demonstrate the process used to develop the rates presented in this filing. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

A handwritten signature in blue ink that reads "Minhe Yu".

## 1. GENERAL INFORMATION

Insurance Company Name	Cigna Health & Life Insurance Company
NAIC Company Code	67369
HIOS Issuer ID	40025
State	California
Market Type	Individual
Proposed Effective Date	01/01/2017
Primary Contact Person and Title	Minhe Yu, FSA, MAAA, Actuarial Manager
Primary Contact Telephone Number	(860)-226-0342
Primary Contact Email	<a href="mailto:Minhe.Yu@Cigna.com">Minhe.Yu@Cigna.com</a>

**Scope and Purpose of Filing:** Cigna Health & Life Insurance Company (CHLIC) is filing rates for comprehensive major medical products 40025CA002 and 40025CA006 for individuals & families, to be effective January 1, 2017. The plans represented in this filing will be Guaranteed Issue & Guaranteed Renewable and are to be marketed through brokers, general agents, and directly to consumers as described in the policy forms. These plans are attached to an existing product that has been submitted under policy form filing CACHIND012017, and a new product that has been submitted under policy form filing CACHINDEPO-012017. These policy forms are not subject to medical underwriting. Please note that the content of this filing is intended to be reviewed by an actuary.

## 2. PROPOSED RATE INCREASE

The proposed weighted average annual rate changes by product, without the impact of aging, are provided below. The rate change reflects the weighted average rate change for all 2016 plans being mapped into a 2017 plan. Section 21 provides the detailed mapping of terminating plans to 2017 plans that was used for the development of the proposed rate change.

2017 HIOS Product ID	40025CA006	40025CA002
Proposed Rate Increase	14.0%	-0.6%

Please note that the Proposed Rate Change above does not equal the Product Rate Increase shown in Section I, Worksheet 2 of the URRT. As stated on page 37 of the Unified Rate Review Instructions, the Product Rate Increase Percent (over Experience Period) of 0.0% 40025CA006 and -1.08% for 40025CA002 in the URRT reflects the average rate increase of the renewing plans only. This field is calculated by the template and does not include the impact on membership mapped from a terminated plan to a new or renewing plan.

The following factors are the main drivers of the proposed rate change:

- Medical inflation and unit cost changes of medical services year over year: The underlying claim costs are expected to increase from 2016 to 2017, which is reflective of anticipated changes in the prices of medical services, the frequency with which consumers utilize services, as well as any changes in network contracts or provider payment mechanisms.
- The non-grandfathered individual marketplace is evolving in light of the material segment changes initiated by the Patient Protection and Affordable Care Act (PPACA), such as the introduction of the guaranteed issue requirement, modified community rating, subsidies, the risk adjustment program, and many other provisions. After consideration for expected risk adjustment transfers, the single risk pool experience for CHLIC in California was more adverse than assumed in the current rates. As a result, CHLIC's best estimate of the average market-wide morbidity of the covered population has increased compared to 2016.
- Transitional Reinsurance Program Changes: As proposed in the 2017 HHS Notice of Benefits and Payment Parameters, the reinsurance program will end with the 2016 benefit year. Consequently, there will be no reduction in claim costs due to the program in 2017, driving an increase in premiums compared to 2016.
- Plan design changes and benefit modifications: Changes have been made to certain plans that are resulting in a decrease in expected cost share and therefore a decrease to premium. All plan designs conform to actuarial value and essential health benefit requirements.
- Health Insurance Industry Fee Changes: The suspension of the HII Fee for 2017 results in a decrease to premium compared to 2016.

The requested rate change is not the same across all plans. The following factors drive different rate changes by plan:

- Plan design changes and benefit modifications
- Trend leveraging due to member cost sharing provisions
- CHLIC has made refinements to the manual rating methodology and refreshed the claim probability distribution (CPD) used in the development of the cost sharing for its plans based on its most recent group experience, which leads to different cost share and expected claim cost changes among plans
- CHLIC has updated the data and methodology used to project changes to customer utilization patterns as a result of changes in cost sharing

### 3. EXPERIENCE PERIOD PREMIUM & CLAIMS

- a. **Paid Through Date:** December 31, 2015
- b. **Premiums in Experience Period:** Premiums in experience period represent actual 2015 premiums received through 12/31/2015 plus expected risk adjustment transfers. [REDACTED]
  - i. Prior to MLR Rebates: [REDACTED]
  - ii. Expected MLR Rebates: [REDACTED]
  - iii. Net of MLR Rebates: [REDACTED]

- c. **Allowed & Incurred Claims:**

All claims are processed through CHLIC’s claim system. Allowed claims shown below represent the sum of payments made under the policy to healthcare providers.

IBNR claims are calculated using completion factors, which represent the known paid claims as a percent of the estimated total accrual as of a particular lag period after a service month. Completion factors for a given reporting period are developed based on historical run-out patterns for national Individual experience, adjusted for actuarial judgment regarding deviance from the average (within a reasonable range based on historical deviance). The methodology used to calculate IBNR does not differ for allowed claims versus incurred claims.

[REDACTED]

### 4. BENEFIT CATEGORIES

To determine benefit categories, CHLIC uses a combination of Procedure Code and Place of Service to categorize each claim under an appropriate Major Service Category. These categories are defined as follows:

- **Inpatient Hospital:** Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.
- **Outpatient Hospital:** Includes non-capitated facility services for surgery, emergency room, lab, radiology, therapy, observation and other services provided in an outpatient facility setting and billed by the facility.
- **Professional:** Includes non-capitated primary care, specialist, therapy, the professional component of laboratory and radiology, & other professional services, except hospital based professionals whose payments are included in facility fees.
- **Other Medical:** Includes non-capitated ambulance, home health care, DME, prosthetics, supplies, vision exams, dental services and other services.
- **Prescription Drug:** Includes drugs dispensed by a pharmacy, net of rebates received from drug manufacturers.

### 5. PROJECTION FACTORS

The Projection Factors described below are included in Section II, Worksheet 1 of the URRT.

- **Changes in the Morbidity of the Population Insured:** Experience was adjusted to account for expected morbidity differences between the underlying experience population and the projected 2017 population. The morbidity adjustment factor accounts for morbidity drivers specific to CHLIC’s single risk pool, including the membership distribution by metal tier, and network type. The morbidity adjustment factor also accounts for expected market-wide morbidity changes due to stronger individual mandate, and increased awareness of Individual health insurance products.
- **Changes in Benefits:** The adjustment for changes in benefits was derived by comparing the average manual allowed claim cost for the 2017 product portfolio, weighted by projected 2017 membership by plan, to the average manual allowed claim cost for the 2015 product portfolio, weighted by 2015 CHLIC experience membership by plan. This adjustment captures anticipated changes in average utilization of services due to differences between the average member cost-sharing during the experience period and the expected average member cost-sharing in the projection period. This adjustment also reflects any additions or removals in benefits due to changes in essential health benefits and/or state required benefits.
- **Changes in Demographics:** An adjustment was made to account for the change in distribution by age and gender between the 2015 underlying experience and the expected 2017 membership. The adjustment factor was developed as the ratio of the membership-weighted average demographic factor using 2017 projected membership, and a similar factor computed using the 2015 actual membership. An area adjustment was also made to reflect differences between the distribution of membership across rating areas in our experience population and our 2017 projected population.
- **Trend Factors:** The source data to determine the trend is national group experience adjusted for market-specific differences. Adjustments were made to account for differences in utilization across major service categories and differences in the formulary between group and individual. CHLIC’s 2015 single risk pool experience is trended forward two years to 2017. The trend for group is deemed appropriate for use in development of individual rates because the networks constructed for group and individual are similar, and any differences in network are captured by a separate network savings decrement.

## 6. CREDIBILITY MANUAL RATE DEVELOPMENT

### a. Source & Appropriateness of Experience Data used in Developing the Manual Rate

The source data used to generate the Manual Rate is trended national group experience adjusted for state- and market-specific differences. The experience for the national group book of business is deemed appropriate for development of the Manual Rate because the baseline experience was not subject to individual medical underwriting and the benefits for the group experience are similar to the benefits required to be ACA compliant. The adjustments to the baseline data are addressed below.

### b. Adjustments made to the Data

The following adjustments were made during the development of the Manual Rate to account for differences between the source data and characteristics of the anticipated population in the Individual Market for the proposed period:

- **Morbidity Load – A [REDACTED] load** was added to the manual rate to account for the difference in morbidity risk of the population underlying the manual rate and the anticipated Individual population in 2017. CHLIC relied on full-year 2015 allowed claims and enrollment data for the Individual market. The morbidity load comprehends the following components:
  - Overall health status in the Individual marketplace – Customers seeking coverage through the Individual market tend to have a different average health status than those who receive coverage through their employer. The average morbidity in the Individual market is driven by external factors such as the strength of the individual mandate, overall awareness of Individual health insurance products, and the presence or absence of transitional policies. All such factors are included in the morbidity load.
  - Membership distribution by metal tier – In the Individual market, individuals tend to select plans that best meet their health needs. Riskier individuals tend to choose plans with lower member cost-share. The expected membership distribution by metal tier therefore impacts the overall expected morbidity in the single risk pool. This adjustment is applied to the index rate only and no plan-specific adjustments are made to account for anticipated differences in health status of enrollees across plans.
- **Demographic Adjustment –** The experience underlying the Manual Rate development does not conform to the 3:1 age slope as prescribed by the ACA. Hence, an adjustment was made to reflect the impact of compression of age slopes as well as to account for the different distribution by age in the 2017 individual market than the distribution by age reflected in the data underlying the Manual Rate.

- Impact of EHB – Most EHBs are already represented in the base experience underlying the derivation of the Manual Rate. However, certain EHBs are not represented in the base experience and the impact of covering these benefits is subsequently added to the Manual Rate, resulting in a [REDACTED] load.
- Network Savings – CHLIC’s underlying network for its proposed plans in this filing is different from the network underlying the experience used in deriving the Manual Rate. The estimated savings of the provider network vary by geographic region, but are incorporated into the Manual Rate based on assumed enrollment by region as an average [REDACTED] decrement for 2017.
- Pharmacy Formulary Savings – Pharmacy claim cost experience used in the development of the Manual Rate is based on national group experience. This group experience is representative of a broader formulary than the formulary associated with CHLIC’s individual product. The narrower formulary results in a savings of [REDACTED] on pharmacy claim costs compared to the Manual Rate.

**c. Inclusion of Capitation Payments**

There are no services provided under a capitation arrangement for plans included in this filing.

**7. CREDIBILITY OF EXPERIENCE**

Limited fluctuation credibility was used to determine the credibility assigned to the 2015 single risk pool experience. 2015 exposure of 100,000 member months was assigned 100% credibility. Therefore, the credibility assigned to 2015 single risk pool experience was [REDACTED].

**8. PAID TO ALLOWED RATIO**

The expected cost-sharing ratio for each benefit plan is calculated by using group experience trended to the proposed filing period to develop a claims probability distribution (CPD). This CPD is then used to estimate member cost-share vs. issuer cost-share for each benefit category and benefit plan. The Paid-to-Allowed Ratio is derived by applying expected distribution of business by benefit plan to the cost-sharing estimates. The expected Paid-to-Allowed Ratio for the 2017 single risk pool is [REDACTED].

Some differences exist between the cost-sharing as calculated above and the Metal AVs that are described in Section 18 of this document. These dissimilarities exist as a result of the following differences in methodology:

- The CPD used to calculate member and insurer cost-share is different from the underlying claims distribution in the continuance tables of the AV Calculator. The continuance tables are based on the default standard population developed by HHS using claims and enrollment from a national commercial database. The CPD is based on claims and enrollment data from CHLIC’s national group book of business. This experience-based CPD has a larger volume of its distribution at the tail, which represents higher average costs.
- The underlying cost assumptions for copays are different in the AV Calculator as compared to CHLIC’s experience. Since most of the proposed plans represented in this filing have copay based cost-sharing for Primary Care Physician and Specialist office visits and some plans have copays on additional services, this causes a difference between the Paid-to-Allowed ratio and the Metal AV for most plans.
- The AV Tool only accounts for in-network benefits, whereas the paid-to-allowed ratio incorporates the impact of out-of-network benefits as well.
- Cost-sharing for other benefits, such as separate copays for urgent care, is not captured in the AV Tool, whereas CHLIC takes these benefits into account when deriving the paid-to-allowed ratio

Note that the Paid-to-Allowed ratio as shown above is CHLIC’s best-estimate of the total expected paid claims that are the liability of CHLIC, divided by the total expected allowed claims for the Projection Period, for the population anticipated to be covered in the Projection Period. The URRT does not accurately demonstrate the process used by CHLIC in the development of rates. As a result, in order to accurately reflect CHLIC’s Projected Allowed Experience Claims, Single Risk Pool Gross Average Premium, Risk Adjustment, and Expense assumptions in the URRT, an adjustment factor of [REDACTED] was applied to the Paid-to-Allowed ratio in Worksheet 1, cell V33 of the URRT.

## 9. RISK ADJUSTMENT & REINSURANCE

### a. Experience Period Risk Adjustment and Reinsurance Adjustments (PMPM)

Reinsurance recoveries for 2015 were estimated by applying the reinsurance parameters as outlined in the 2015 Notice of Benefits & Payment Parameters to 2015 CHLIC member-level experience in California. Projected reinsurance recoveries on IBNR claims was also estimated based on actual 2015 experience.

The expected member-level risk transfer amounts for 2015 were calculated based on 2015 CHLIC experience in California [REDACTED]. CHLIC-specific risk scores and other transfer formula components were calculated internally in accordance with the Notice of Benefit and Payment Parameters for 2015 final rule (CMS-9954-F). [REDACTED]

### b. Projected Risk Adjustments (PMPM)

A 2017 net risk transfer [REDACTED] PMPM is assumed. This total includes a projected risk transfer [REDACTED] PMPM and risk adjustment user fees of [REDACTED] PMPM, both on an allowed basis. Equivalently, the projected risk transfer on a paid basis is [REDACTED] with risk adjustment user fees of \$0.13 PMPM.

To model expected 2017 risk transfer dynamics, 2015 member-level risk transfer amounts were projected based on 2015 nationwide CHLIC experience using all components of the HHS risk transfer formula. In order to develop these risk transfer amounts, corresponding market-level estimates of the 2015 risk transfer formula were [REDACTED]. The expected 2015 risk transfers were adjusted to account for expected changes as a result of moving to the initially proposed 2017 risk adjustment model. Finally, the projected 2017 transfer amounts were calculated based on these 2015 risk transfers further adjusted for:

- a) The expected 2017 morbidity of CHLIC's single risk pool relative to the expected market-average morbidity in California, as outlined in Section 5 of this document
- b) The average paid-to-allowed ratio as outlined in Section 8 of this document, to provide final estimates on an allowed basis for development of the market adjusted index rate

The projected 2017 net allowed risk transfer [REDACTED] PMPM was applied to the Index Rate in the development of the market average index rate and does not match cell V35 on Worksheet 1 of the URRT, which is on a paid basis. The impact of net risk adjustment is a [REDACTED] of CHLIC's 2017 premiums.

CHLIC does not anticipate any fees or receipts from the risk corridor program in 2017 and has not included any pricing adjustments for risk corridor payments in rate development.

### c. Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

As proposed in the 2017 HHS Notice of Benefits and Payment Parameters, the reinsurance program will end with the 2016 benefit year. Consequently, no reinsurance recoveries have been applied to the Index Rate in the development of the Market Average Index Rate.

## 10. NON-BENEFIT EXPENSES, PROFIT, & RISK

The following table illustrates anticipated breakdown of the retention components. [REDACTED] This equates to [REDACTED] and is derived based on the projected expenses as a portion of projected average statewide premium with a target loss ratio of [REDACTED]. Actual expenses on both a PMPM and percentage of premium basis will vary based on the actual size and distribution of membership by age and plan.

### a. Administrative expense load

CHLIC's non-medical expenses are split out as follows:

- Acquisition administrative expense – this includes, but is not limited to, incentive compensation & salaries for brokers and agents, commissions†, marketing costs (working media & non-working media), and vendor fees.
- Recurring administrative expense – this includes, but is not limited to, costs relating to customer analytics, service operations, account management, and corporate overhead.

The administrative expense load is based on internal estimates from CHLIC’s Financial Analysis team and is deemed appropriate for the plans proposed in this filing. To determine this load, membership for CHLIC’s benefit plans is projected as outlined in Section 20. This membership is then applied to known budgeted amounts for administrative expenses to determine an appropriate administrative load across all plans as a percentage of premium allocation. [REDACTED]

† [REDACTED]

**b. Profit & Risk Margin**

CHLIC has targeted a [REDACTED] profit margin that is built into its premium rates. [REDACTED] In the event that actual membership size and distribution differs from expectations, the actual profit margin may vary. There is no additional risk margin load.

**c. Taxes & Fees**

Please note that this section excludes contributions to the risk adjustment user fees, since these fees are included in the projected risk transfer, per Section 4.4.8 of the 2017 Unified Rate Review Instructions.

- Premium Tax is applied as 2.35% of premium
- PCORI Fee is applied as \$2.26 PMPY or 0.04% of premium

**11. PROJECTED LOSS RATIO**

The projected 2017 PPACA MLR, without adjustment for credibility, for CHLIC’s individual products is [REDACTED].

A demonstration of the projected MLR calculation is illustrated below:

[REDACTED]

- \* Quality Improvement Activities, Risk Adjustment & Risk Corridor Receipts
- \*\* Premium/Payroll/Federal Income Tax and ACA Fee Adjustments

Figures in the PPACA MLR exhibit have been calculated as follows:

- Member Months – projections for member months are developed internally as best estimates generated by applying current market share percentages and additional adjustments to take into account the addressable market opportunity. This figure ties to Cell X47 in Worksheet 1 URRT.
- Incurred Claims – projections for incurred claims are consistent with Cell X34 in Worksheet 1 of the URRT.
- Claims Adjustment – defined as specified by HHS Notice of Benefit & Payment Parameters for 2017 (Final Rule)
- Earned Premium – projections for earned premium are developed by applying the projected average rate PMPM from cell V43 in Worksheet 1 of the URRT to the expected member months projections specified earlier.
- Premium Adjustment – defined as specified by HHS Notice of Benefit & Payment Parameters for 2017 (Final Rule)
- Credibility Adjustment – The credibility adjustment is calculated using the methodology specified in 45 CFR 158.232. This adjustment incorporates the impact of the base credibility factor and the average deductible factor.

**12. SINGLE RISK POOL**

CHLIC has included all covered lives for every non-grandfathered product/plan combination in the individual market in California in the single risk pool, as specified in 45 CFR 156.80(d). Please note that CHLIC does not have any transitional policies.

**13. INDEX RATE**

The Index Rate of the Experience Period for this filing is [REDACTED]. The Index Rate of the Experience Period in Section I, Worksheet 1 of the URRT represents the total combined 2015 allowed claims experience PMPM attributable to Essential Health

Benefits in the single risk pool. It is consistent with the Experience Period Allowed Claims PMPM, as shown in Section II, Worksheet 1 of the URRT, since no benefits in addition to EHBs were offered in the experience period.

The Index Rate for the Projection Period for this filing is [REDACTED] and was developed in accordance with 45 CFR Part 156.80(d). The Index Rate for the Projection Period identified in Section III, Worksheet 1 of the URRT was generated using the same methodology as used in determining the Single Risk Pool Gross Premium Average Rate in Cell V43 of Worksheet 1 in the URRT. Hence, the Projected Index Rate is a representation of the Expected Allowed Claims for 2017 attributable to Essential Health Benefits, and incorporates the impact of trend, benefit, morbidity, and demographic adjustments as outlined in Sections 5 and 6 of this document. Refer to Section 7 of this document for additional information regarding the credibility attributed to single risk pool experience in the development of the Index Rate for the Projection Period. There are no benefits in addition to EHBs that are being covered under the proposed plans in 2017. No consideration is granted to the expected impact of specific eligibility categories for catastrophic plans because these plans are not being proposed in this filing.

#### 14. MARKET ADJUSTED INDEX RATE

The Market Adjusted Index Rate for this filing is [REDACTED]. The Market Adjusted Index rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80 (d)(1). The following market-wide adjustments have been made to the Index Rate, as allowed under these rules:

- Risk Transfer - The Index Rate has been adjusted for the net transfer from the risk adjustment program. This adjustment equates to an impact of [REDACTED] PMPM on the Index Rate.

Please refer to Risk Adjustment and Reinsurance Section (section 9) for detailed explanation of how the Risk adjustment was developed.

The Market Adjusted Index Rate reflects the average demographic characteristics of the single risk pool and is not calibrated.

#### 15. PLAN ADJUSTED INDEX RATE

##### a. Plan Adjusted Index Rate for the Projection Period

Only the following allowable modifiers (as specified in 45 CFR 156.80(d)) have been used to adjust the Market Adjusted Index Rate to arrive at the Plan Adjusted Index Rates:

- Plan-specific actuarial value and cost sharing adjustments
- Administrative costs, excluding the Risk Adjustment User Fee

The adjustment Impact of specific eligibility categories for the catastrophic plan is not applicable since CHLIC does not plan to offer catastrophic plans in 2017.

Note that the AV and cost-sharing adjustment encompasses expected cost-sharing differences, utilization differences due to differences in cost-sharing.

The expected cost-sharing ratio for each benefit plan is calculated by using group experience over the experience period (trended to the proposed filing period) to develop a claims probability distribution (CPD). This CPD is then used to estimate member cost-share vs. issuer cost-share for each benefit category and benefit plan.

In addition to cost sharing differences, this adjustment also includes utilization differences due to differences in cost sharing. In evaluating adjustment for utilization changes, CHLIC has relied on internal studies that used regression analysis at the major service category level, to develop a relationship between historical utilization and corresponding expected cost-sharing. This adjustment is consistent with the description on page 62 of the 2017 Unified Rate Review Instructions. There are no explicit and/or additional adjustments used in our rate development process that reflect expected differences in utilization due to health status.

##### b. Plan Adjusted Index Rate for the Experience Period

The Plan Adjusted Index Rate for the Experience Period has been included in row 55 on Worksheet 2 of the URRT. This represents the expected non-calibrated statewide average premium for a non-tobacco user based on expected membership at time of 2015

Pricing. The Plan Adjusted Index Rate for the Experience Period differs from the average premium rate in Section I of Worksheet 1 due to the following items:

- Differences between projected and actual 2015 membership by age and geography

**16. CALIBRATION**

CHLIC calibrates the Plan Adjusted Index Rates to apply the allowable rating factors (age and geography) in order to calculate Consumer Adjusted Premium Rates. The calibration for each allowable rating factor is described below.

**a. Age Curve Calibration**

The weighted average age factor for the projected membership was calculated using the Default Federal Standard Age Curve. The average age associated with this projected membership (rounded to the nearest whole number) is [REDACTED]. This single risk pool average age was determined using the current 2016 age distribution in the single risk pool. Plan Adjusted Index Rate was divided by the weighted average age factor mentioned above, to arrive at the calibrated Plan Adjusted Index Rate for a 21 year old. A demonstration of how the Plan Adjusted Index Rate and the age curve were used to generate the calibrated Plan Adjusted Index Rate for each plan is provided below.

**b. Geographic Factors**

Rate variations among geographical areas vary only by the geographic rating regions defined by the federal government. Area factors reflect only differences in the cost of the delivery of medical services among rating areas for a standard population and fixed market basket of covered services. The following table shows the geographic factors for each defined area in California:

[REDACTED]

An average geographic factor is developed based on the projected distribution of membership across all areas. Then the calibrated Plan Adjusted Index Rate is calculated as Plan Adjusted Index Rate divided by this weighted average geographic factor.

A demonstration of calibration for the Plan Adjusted Index Rate is provided in the table below.

[REDACTED]

\* The Plan Adjusted Index Rate represents average premium for the projected single risk pool at the unrounded average age, weighted using the best-estimate Default Federal Standard Age Curve factors. Linear interpolation between integer Default Federal Standard Age Curve factors was used in the development of the Demographic Calibration factor.

**17. CONSUMER ADJUSTED PREMIUM RATE**

Consumer Adjusted Premium Rate is developed by applying the following allowable adjustments to the calibrated Plan Adjusted Index Rate.

- Individual and family tier – applied by summing the premiums for each individual family member, provided at most three child dependents under age 21 are taken into account
- Rating area factor – applied by multiplying the area factors to the calibrated Plan Adjusted Index Rate
- Age factor – applied by multiplying the age factor to the calibrated Plan Adjusted Index Rate

**18. AV METAL VALUES**

The AV Metal Values shown in Worksheet 2 of the URRT for the plans listed below were based on the AV Calculator, with the exception of the following unique benefits for select plan designs:

- Cost-Sharing for Pharmacy Retail vs. Home-Delivery Service
- Copays for Inpatient Services
- Cost Sharing for Mental Health/Substance Abuse Outpatient Office Visit vs. Facility Visit Services
- Cost Sharing for Telehealth
- Copays for Urgent Care Services

These benefits were outside the scope of the AV Calculator and hence an alternate methodology was deemed necessary as per 45 CFR 156.135(b). The impacted plans, alternate methodologies, and the reason for their use is explained in the accompanying actuarial certification titled “Unique Plan Design Supporting Documentation & Justification”.

**19. AV PRICING VALUES**

A demonstration of the development of the Plan Adjusted Index Rate from the Market Adjusted Index Rate is provided table below.

CHLIC is not incorporating any impact due to the different morbidity or health status of individuals who select certain plans in the derivation of the Pricing AV. See Section 15 in this document for an explanation of the factors used in the development of the Pricing AV.

**20. MEMBERSHIP PROJECTIONS**

The membership projections for CHLIC’s benefit plans are developed internally as best estimates. They were derived from CHLIC 2016 open enrollment experience and assumed channel growth in California. Active membership splits were used to develop projections by metal tiers, together with growth assumptions by channel. The projected distribution of member months represents our expectation of the industry average distribution of enrollment by age for the Individual Market for 2017.

**21. TERMINATED PRODUCTS**

The tables below show the plan mapping for terminating plans to new or existing plans in 2017. Blank cells indicate that plans were terminated and unmapped in 2016 or 2017.

**22. PLAN TYPE**

The plan types as inputted in Section I, Worksheet 2 of the URRT accurately describe the plans in this filing.

**23. WARNING ALERTS**

Rows 57 – The Plan Adjusted Index Rate and Total Premium for the Experience Period differs from the average premium rate in Section I of Worksheet 1 due to differences in projected versus actual distribution of membership by age and geography as well as differences in projected versus actual risk adjustment transfers. See Section 15 in this document for additional information regarding the Plan Adjusted Index Rate for the Experience Period.

Row 68 & 73 – Per Worksheet 2 of the URRT, the Total Incurred claims payable with issuer funds equals allowed claims less all allowed claims which are not the issuer’s obligation, including member cost-sharing, reinsurance and risk adjustment receivables or payables, and cost-sharing paid by HHS on behalf of low-income members. However, page 14 of the Universal Rate Review Instructions indicates that the Incurred Claims in Experience Period, as shown on Worksheet 1 of the URRT, is allowed claims less member cost-sharing and cost-sharing paid by HHS on behalf of low-income members. Therefore, cell F15 on Worksheet 1 of the URRT is not adjusted for expected receipts or payments for the reinsurance or risk adjustment programs for 2015, while rows 68 and 73 on Worksheet 2 are adjusted for these payments.

**24. EFFECTIVE RATE REVIEW INFORMATION**

**a. Financial Information**

Cigna Health & Life Insurance Company (CHLIC)					
(\$ Millions)	2012	2013	2014	2015	2016 (Proj)
Post-Tax Stat Net Income	301	489	1,047	1,187	
Stat Capital & Surplus	1,018	1,714	2,800	3,009	

<b>Asset Valuation Reserve</b>	22	45	97	148	████████
<b>Authorized Control Level RBC</b>	172	355	480	566	████████
<b>Dividend History</b>	0	0	0	750	████████
<b>Return on Equity</b>	38%	35%	46%	41%	████████

CHLIC is in strong financial condition. The YE 2015 ACL RBC ratio was 558%. In prior years when the company was significantly smaller, the RBC ratio was much higher. For the next few years, CHLIC is expected to maintain an ACL RBC ratio around ██████████. The proposed plans and rates will have an immaterial impact on the company’s financial condition, even with significant membership growth.

**b. Rating Information**

To see the proposed rate manual by age, area and smoking status please reference the accompanying QHP Rate Table Template. For additional rating rules used in deriving the premium please refer to the accompanying Business Rules Template.

A description of the benefits for all plans proposed in this filing is shown in the accompanying Plans Benefits Template.

Please note that CHLIC shall satisfy the requirement to offer coverage for all essential health benefits off-exchange by providing all applicants a medical policy that covers the pediatric dental benefit.

**c. Other**

CHLIC’s anticipated loss ratio (without ACA adjustments) for the proposed plans in this filing is ██████████.

**25. RELIANCE**

I have relied on data and analysis provided by Harsh Mota, Actuarial Senior Analyst, in developing the proposed premium rates and in preparing the Part 1 Unified Rate Review Template submission. I have also relied on claim, premium, enrollment, and risk score data supplied by Lyn Dills, Analytics Senior Specialist, and Allyssa Ward, Actuarial Specialist. The data have been reviewed for reasonableness but have not been audited. In addition, I have relied on other internal and external sources, ██████████, to develop the underlying assumptions used in the pricing methodology.

**26. ACTUARIAL CERTIFICATION**

I, Minhe Yu, am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I certify, to the best of my knowledge and judgment, that:

- a) The rates proposed in the above noted rate filing are
  - In compliance with all applicable State & Federal Statutes & Regulations (45 CFR 156.80(d)(1))
  - Developed in compliance with applicable Actuarial Standards of Practice, including but not limited to the following:
    - ASOP #5, Incurred Health & Disability Claims
    - ASOP #8, Regulatory Filings for Health Plan Entities
    - ASOP #12, Risk Classification
    - ASOP #23, Data Quality
    - ASOP #25, Credibility Procedures Applicable to Accident & Health, Group Term Life, and Property & Casualty Coverages
    - ASOP #26, Compliance with Statutory & Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
    - ASOP #41, Actuarial Communications
  - Reasonable in relation to the benefits provided and the population anticipated to be covered
- b) The Projected Index Rate presented in this filing is:
  - a. In compliance with all applicable state and Federal statutes and regulations in 45 CFR 156.80(d)(1)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient

- c) Plan level rates were generated using only the index rate and allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2)
- d) The geographic rating factors reflect only differences in the costs of delivery, including unit cost and provider practice pattern differences, and do not include differences for population morbidity by geographic area.
- e) The percent of total premium that represents Essential Health Benefits included in Worksheet 2, Section IV, of the Part 1 URRT was calculated in accordance with applicable Actuarial Standards of Practice
- f) The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans, save the exceptions shown in Section 18, which are further explained in the accompanying actuarial certification “Unique Plan Design Supporting Documentation & Justification”.

The URRT does not demonstrate the process used to develop the rates presented in this filing. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

---

Minhe Yu, FSA, MAAA

Rate Filing for Individual Health Plans  
CACHIND012017 – Effective 01/01/2017  
CACHINDEPO-012017 – Effective 01/01/2017**

Dear Mr. Whitmarsh,

This rate filing contains requested premium rate changes for Cigna Health and Life Insurance Company's (CHLIC) ACA compliant Individual health plans. The proposed rates are intended to take effect on January 1, 2017. This filing affects the rates approved under SERFF tracking number CCGH-130050822.

Enclosed within this filing are the Unified Rate Review Submission, Part 2 Rate Increase Justification, Part 3 Actuarial Memorandum, Rate Tables, Business Rules, Unique Plan Design Certification, and AVC Inputs files.

CHLIC requests confidential handling of this filing. We believe that this information is proprietary and critical to our business. The release of such information could be harmful if made public.

Please contact Harsh Mota at 860.226.4035 or at [Harsh.Mota@Cigna.com](mailto:Harsh.Mota@Cigna.com) with any questions or concerns.

Thank you for your attention.

Sincerely,

A handwritten signature in blue ink that reads "Minhe Yu".

		For each Plan rule, enter only the Plan ID and the business rules that differ from the Product or Issuer Rule									
HIOS Issuer ID* TIN* 59-1031071		40025									
Product ID	Plan ID (Standard Component)	How are rates for contracts covering two or more enrollees calculated?	What are the maximum number of under age (under 21) dependents used to quote a two parent family?	What are the maximum number of under age (under 21) dependents used to quote a single parent family?	Is there a maximum age for a dependent?	What are the maximum number of children used to quote a children-only contract?	Are domestic partners treated the same as secondary subscribers?	Are same-sex partners treated the same as secondary subscribers?	How is age determined for rating and eligibility purposes?	How is tobacco status determined for subscribers and dependents?	What relationships between primary and dependent are allowed, and is the dependent required to live in the same household as the primary subscriber?
		A different rate (specifically for parties of two or more)for each enrollee is added together	3 or more	3 or more	25	3 or more	Yes	Yes	Age on effective date	Not Applicable	Spouse, No; Adopted Child, No; Ward, No; Stepson or Stepdaughter, No; Self, No; Child, No; Life Partner, No

## 1. HIOS Issuer ID:

40025

## 2. HIOS Product ID(s):

40025CA006

## 3. Applicable HIOS Plan ID(s) (Standard Component):

40025CA0060006  
40025CA0060007  
40025CA0060008

## 4. Reasons the plan design is unique (benefits that are not compatible with the parameters of the AV calculator, and the materiality of those benefits):

In this section we have provided a description of the features of the plan designs that are considered unique and not compatible with the AV Calculator parameters along with a table that outlines which plans have these features.

The following features of the plan design(s) are considered unique and not compatible with AV Calculator parameters:

- Cost-Sharing for Pharmacy Retail vs. Home Delivery Service – The proposed plans in this filing offer Home Delivery pharmacy prescriptions in addition to retail pharmacy prescriptions. Since the AV Calculator does not allow for separate cost share inputs for retail and home delivery pharmacy prescriptions, the cost share for the pharmacy benefit was not compatible with the existing parameters of the AV Calculator.
- Outpatient Mental Health and Substance Abuse Services – The proposed plans in this filing offer coverage for outpatient mental health and substance abuse services in both an office visit setting and a facility visit setting. Since the AV Calculator does not allow for separate cost share inputs for outpatient mental health and substance abuse office and facility visits, the cost share for these benefits was not compatible with the parameters of the AV Calculator.
- Telehealth – The proposed plans in this filing offer a different cost structure for a Primary Care Visit in a traditional setting versus a Telehealth setting. Since the AV Calculator does not allow for separate cost share inputs for a Telehealth setting, the cost share for the Primary Care Visit benefit was not compatible with the parameters of the AV Calculator.
- Copays for All Inpatient Hospital Services – The proposed plans in this filing have a separate cost structure for the inpatient facility services versus physician services. Since the AV Calculator does not allow for separate cost share inputs, the parameters for the inpatient cost structure were not compatible with the existing parameters in the AV Calculator.
- Copays for Urgent Care Services – The AV Calculator does not currently provide an input for copays for Urgent Care Services because the National Claims Database that the Calculator is based on does not maintain data on Urgent Care Services. Some of the plans proposed in this filing include benefit designs that have copays for Urgent Care Services which are not compatible with the AV Calculator.

## Unique Plan Design Supporting Documentation & Justification

The following table illustrates which benefit plans contain these unique plan design features:

Unique Plan Feature					
Plan ID	Rx Retail vs Home-Delivery	Outpatient MHSA	Telehealth	Inpatient Hospital Copays	Urgent Care Copays
40025CA0060006	✓	✓	✓	✓	✓
40025CA0060007	✓	✓	✓		
40025CA0060008	✓				

### 5. Acceptable alternate method used per 156.135(b)(2) or 156.135(b)(3):

In order to quantify the Actuarial Value of each unique plan feature, an alternate method per 156.135(b)(2) was used. In line with the proposed methodology of 156.135(b)(2), an estimate of the plan design feature was fitted into the AV Calculator to align with the Calculator's existing input parameters. Alternate methods per 156.135(b)(3) were not utilized.

### 6. Confirmation that only in-network cost-sharing, including multitier networks, was considered:

For the purpose of quantifying the Actuarial Value of each unique plan design, only In-Network cost sharing was brought into consideration. CHLIC did not account for Out-Of-Network cost sharing during this process.

### 7. Description of standardized plan population data used:

The standardized plan population data used for calculating the AV of plans with the Rx, Rx Retail vs. Home Delivery, Outpatient Mental Health and Substance Abuse, Telehealth, and Copays for All Inpatient Hospital Services unique plan features is the default standard population developed by HHS for AV calculation and provided as an underlying assumption to the Continuance Tables in the AV Calculator. In addition, for the pharmacy unique plan design features, as discussed in Section 8, internal national individual experience was used in order to develop the inputs entered into the AV Calculator.

### 8. If the method described in 156.135(b)(2) was used, a description of how the benefits were modified to fit the parameters of the AV calculator:

Cost-Sharing for Pharmacy Retail vs. Home Delivery Service – The cost-sharing for each tier was blended prior to being input in the AV Tool based on expected utilization patterns for retail pharmacy services as opposed to home delivery pharmacy services.

Outpatient Mental Health and Substance Abuse Services – A study was conducted to determine how to fit this unique plan design feature into the AV calculator. Based on the analyses performed, it was determined that the impact to the AV is not material. The definition of materiality used is consistent with the *Practice Note on Minimum Value and Actuarial Value Determinations Under the Affordable Care Act* issued by the American Academy of Actuaries in April 2014. In summary, the magnitude of the impact is minimal and no plans fell out of metal tier range. Given the study indicated that the majority of Outpatient Mental Health and Substance Abuse services are performed in an Office Visit Setting, the cost sharing amount applicable to Outpatient Mental Health and Substance Abuse services performed in an Office Visit setting was entered into the AV Calculator.

Telehealth – We used our national group experience to estimate the utilization pattern for the Primary Care Visit in a Telehealth setting. The Telehealth copay and utilization was blended with the copay and utilization for a Primary Care Visit in a traditional setting. The blended benefit was then input into the AV Calculator under the Primary Care Visit’s copay and is deemed to be adequately representative of the member cost-sharing.

Copays for All Inpatient Hospital Services – We used a claim probability distribution that is derived from our internal national group experience to estimate the utilization split for inpatient facility services and inpatient physician services. Based on the analyses performed, it was determined that the impact to the AV is not material. The definition of materiality used is consistent with the *Practice Note on Minimum Value and Actuarial Value Determinations Under the Affordable Care Act* issued by the American Academy of Actuaries in April 2014. In summary, the magnitude of the impact is minimal and no plans fell out of metal tier range. Given the analyses indicated that the majority of the utilization is expected to come from inpatient facility services, the benefit structure for inpatient facility services was applied to All Inpatient Hospital Services in the AV Calculator.

Copays for Urgent Care Services – We used a claim probability distribution that is derived from our internal national group experience to estimate the overall utilization of urgent care services and the coinsurance percentage that would result in an equivalent paid-to-allowed ratio as the urgent care copay as defined in our benefit plans. A study was conducted to determine how to fit this unique plan design feature into the AV calculator. Based on the analyses performed, it was determined that the impact to the AV is not material. The definition of materiality used is consistent with the *Practice Note on Minimum Value and Actuarial Value Determinations Under the Affordable Care Act* issued by the American Academy of Actuaries in April 2014. In summary, the magnitude of the impact is minimal and no plans fell out of metal tier range.

**9. If the method described in 156.135(b)(3) was used, a description of the data and method used to develop the adjustments:**

The method described in 156.135(b)(3) was not used.

**10. Certification Language:**

I, Minhe Yu, am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I certify, to the best of my knowledge and judgment, that:

- a) The development of the actuarial value is based on one of the acceptable alternative methods outlined in 45 CFR 156.135(b)(2) or 156.135(b)(3) for those benefits that deviate substantially from the parameters of the AV Calculator and have a material impact on the AV.
- b) All analysis in the development of the actuarial value was performed in accordance with generally accept actuarial principles & methodologies and in accordance with the ASOPs established by the ASB and all applicable laws and regulations.
- c) The metal levels were appropriately assigned in accordance with 45 CFR 156.135 and 156.140.

This certification applies explicitly to the 2017 plan year for the Individual market for the plans denoted above.

## 1. GENERAL INFORMATION

Cigna is filing rates for Individual medical plans in California effective January 2017 through December 2017. The proposed rate increases exceed the “subject to review” threshold in 45 CFR § 154.200. In accordance with the requirements in 45 CFR § 154.215, this document describes the justification for the rate increases.

## 2. SCOPE AND RANGE OF RATE INCREASE

Cigna estimates that 18,253 customers will be impacted by this rate increase. On average, customers will see an increase of 12%, excluding the impact of aging, with a range of increases from -8% to 39%. In addition to the factors described below, each customer’s rate increase depends on factors such as where they live, and the plan in which they are enrolled.

## 3. SIGNIFICANT FACTORS

The most significant factors requiring the rate increase are:

- **Changes in Medical Service Costs:** The increasing cost of medical and pharmacy services and supplies accounts for a sizeable portion of the premium rate increases. Cigna anticipates that the cost of medical and pharmacy services and supplies in 2017 will increase over the 2016 level because of prices charged by doctors, hospitals, and other providers, in addition to more frequent use of medical services by customers.
- **Transitional Reinsurance Program Changes:** The federally mandated transitional reinsurance program was in effect from 2014 to 2016 and is ending for 2017. The funding available to issuers under the reinsurance program was used to offset adverse claim experience. Additional premium is required to compensate for the elimination of the reinsurance program in 2017.
- **Morbidity (Risk Pool) Adjustments:** The marketplace for non-grandfathered individual plans is affected by provisions of the Patient Protection and Affordable Care Act (the “Affordable Care Act”) that became effective in 2014, including:
  - guarantee issue and renewal requirements
  - modified community- rating requirement
  - federal premium subsidies for low and moderate income individuals.

The effects of these 2014 changes when coupled with previous regulatory changes and overall utilization experienced in 2014 and 2015 suggest that it is appropriate to increase the overall claim level assumption reflected in the premiums for individual plans in California.

## 4. EXPERIENCE & PROJECTIONS

Non-grandfathered individual plans subject to the changes brought about by Affordable Care Act have only been effective since January 1, 2014. Our claim experience indicates that the loss ratios for Cigna’s individual plans in California will be in excess of the federally defined minimum loss ratio threshold of 80% in 2015. Furthermore, Cigna’s 2015 financial results in California are worse than the level required for long-term sustainability in the market. The proposed 2017 rate increase is expected to bring loss ratios in line with Cigna’s target level. Even with the proposed 2017 rate increase, we expect that the loss ratios for our individual plans to exceed the federally defined minimum loss ratio threshold of 80%, thereby ensuring that the amount of premium spent on claims and quality improvement activities is more than required by the Affordable Care Act.

## 5. ADMINISTRATIVE COSTS AND ANTICIPATED PROFITS

In addition to the cost of medical services, there are a number of indirect medical and non-medical costs that Cigna pays. These costs include programs that promote quality care and health for a patient, taxes and fees that must be paid to federal, state or local governments, and assessments that states charge to pay for public health programs (e.g., childhood vaccines). Additional costs include financial examinations by the government, prevention of healthcare fraud, payments to agents or brokers who help customers enroll in health plans and other business costs such as employees’ salaries, building upkeep, utilities, etc. These administrative costs contribute to the overall premium a customer has to pay.

Cigna has not made any changes to the targeted profit amount.

### **6. Cigna's COMMITMENT TO THE PEOPLE WE SERVE**

Cigna's objectives of improved health, quality and cost with a focus on the individual are all closely aligned with the company's mission and strategy for a sustainable and affordable healthcare system. Cigna's product offerings in this market reflect its principles, and Cigna's plans are designed to help individuals:

- Navigate the complex world of healthcare to access valuable, cost-effective care.
- Find the right family doctor from local networks which are increasingly aligned to innovative partnerships centered around high-performing, value-based physician networks
- Easily access information. Cigna's nurses, customer service, and important health, benefit, and plan information are there when customers need it 24-7-365 via phone, online, and mobile devices with Cigna's consumer apps.

These capabilities are available to Cigna's 14 million-plus US customers: from the Fortune 500 CEO to the individual purchasing a Cigna health plan for the first time on the health insurance marketplace.

In the individual and family plan market, Cigna is making a dedicated effort to outreach and engage its customers starting with a robust onboarding program. Through this outreach Cigna is increasingly helping more people find quality care providers who are both cost efficient while using evidence based medicine best practices. Cigna will help those who require prescription medications to identify generic equivalent medications which may save them hundreds of dollars annually. And for those who may have a chronic illness, Cigna puts them in touch with its medical management nurses to help them navigate the system with personalized assistance.

As our understanding of the specific needs and preferences of the marketplace becomes more refined, Cigna plans to continue to improve its product offerings so that they are closely aligned with the health, well-being and sense of security of the communities we serve.

All Cigna products and services are provided exclusively by or through operating subsidiaries of Cigna Corporation, including Cigna Health and Life Insurance Company. The Cigna name, logo, and other Cigna marks are owned by Cigna Intellectual Property, Inc.
